Hatzopoulos, Nikolaos J. Hatzopoulos, 2024-05-01 This book is for students and professionals involved in Geospatial Computations and related areas such as Geomatics Surveying Engineering Geoinformatics Geospatial Information Science and Technology GIS T Geography Geology Agriculture and Geointelligence More emphasis is given to using scientific methods and tools materialized in algorithms and software to produce practical results Specifically algorithms such as error analysis of measurements and the least squares adjustment method to obtain ground coordinates of points with their reliability to construct the geometric framework of the geographical space necessary for various geospatial applications such as a Geographic Information System GIS are discussed Other algorithms involve interpolation methods for DEM and spatial data analysis Furthermore such algorithms in the geospatial area are basic surveying methods using a total station photogrammetry digital terrain modeling GNSS augmented reality coordinate transformations map projections and interpolation Most algorithms are implemented into 27 educational computer programs and necessary data to understand GIS T operations from the inside with a didactics approach targeting to become more intelligent than machines The educational programs include general photogrammetric operations with aerial photography and drones 3 D surveying network adjustment GNSS navigation solutions and many others This approach helps to obtain high quality scientific and technological bases which in turn enhance the ability to exploit and use most tools and functions of existing GIS T systems and therefore to be highly competitive as a professional in the market This book has ten chapters such as Measurements and Errors Estimation and Accuracy Standards Specialized Numerical Methods Error Propagation Least Squares Adjustment Condition Method and Generalized Least Squares Applications to Map Projections and Transformation of Coordinates Applications to Surveying Networks Applications of Computational Methods in Photogrammetry Digital Elevation Models DEM Computer Programming Scripting AI *Surveying for Civil and Mine Engineers* John Walker, Joseph Awange, 2020-06-06 This updated and expanded edition of the book includes four additional chapters on earthwork on sloping sites transitional curves and super elevation calculations of super elevations on composite curves and underground mine surveying Richly illustrated with diagrams equations and tables as well as examples of every day survey tasks It also covers new topics such as the global navigation satellite system s Real Time Kinematic RTK which are increasingly used in a wide range of everyday engineering applications *A Research Guide to Cartographic Resources* Eva H. Dodsworth, 2018-09-22

The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields. A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old. Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations. A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material. Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources. Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites. Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level. This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets.

[Advances in Unmanned Aerial Vehicles - Technology and Applications - Big Issues Solved with Drone Technology](#) Antoni Grau, Rodrigo Munguia, 2025-09-03 In your hands you hold a book that will be of great help in understanding and demystifying Unmanned Aerial Vehicles UAVs those robots that for many are nothing more than flying machines. Here you will discover that behind these mysterious devices lies highly advanced technology backed by years of experience which enables UAVs to fly intelligently and autonomously. There are no secrets just years of development and the expertise of technologists who have joined forces to create these machines that continue to amaze us all. UAVs have a wide range of applications and this book presents exemplary cases of their responsible use in environmental protection and conservation across various ecosystems. Flying robots offer a unique perspective one that differs from the human viewpoint giving them a special role in the beneficial use of technology. Additionally general purpose applications are presented to help the reader understand how flying robots are utilized and how they can support humanity in noble and meaningful ways.

[An Introduction to GNSS Geodesy and Applications](#) Clement A. Ogaja, 2024-12-26 This volume is the second edition to 2022's Introduction to GNSS Geodesy Foundations of Precise Positioning Using Global Navigation Satellite Systems.
