Foreign Policy Analysis And Rational Choice Models:

Conflict, Security, Foreign Policy, and International Political Economy Michael Brecher, Frank P. Harvey, 2009-12-11 No study of international relations is complete without consideration of foreign policy processes and an understanding of state security conflict in global politics and the relationship between the world economy and international behavior Conflict Security Foreign Policy and International Political Economy Past Paths and Future Directions in International Studies consists of twelve original essays that point out the strengths and weaknesses of current approaches in these research areas as well as suggest agendas for future research See table of contents and excerpts Frank P Harvey is Professor of Political Science and Director of the Centre for Foreign Policy Studies at Dalhousie University Michael Brecher is the R B Angus Professor of Political Science at McGill University and past president of the International Studies Association Millennial Reflections on International Studies This volume is part of the Millennial Reflections on International Studies project in which forty five prominent scholars engage in self critical state of the art reflection on international studies to stimulate debates about successes and failures and to address the larger questions of progress in the discipline Other paperbacks from this project Realism and Institutionalism in International Studies Evaluating Methodology Critical Perspectives in International Studies The full collection of essays is available in the handbook Millennial Reflections on International Studies *Temporal Horizons and Strategic Decisions in U.S.-China Relations* Daniel Joseph Tauss, 2015-05-06 Using an interdisciplinary social science approach Temporal Horizons and Strategic Decisions in US China Relations Between Instant and Infinite takes on the challenge of understanding the foreign policy decision process through the lens of the temporal horizon A temporal horizon is the distance into the future a decision maker prioritizes when evaluating outcomes and considering possibilities By looking at a number of recent key moments of US China relations that have immediate short term long term and far reaching implications the book considers which are predominant in the policy process Looking at the role of time as a factor in the decision making process is not new to political science but this book attempts to break down and articulate the process by looking at a range of specific time frames The book places special attention on future considerations in a variety of ways combining the insights of psychology economics and future studies to consider political science in a new manner

Millennial Reflections on International Studies Michael Brecher, Frank P. Harvey, 2009-12-22 Collection of essays that debate the question of progress in the discipline Explaining Foreign Policy in Post-Colonial Africa Stephen M. Magu, 2021-01-02 This book explores foreign policy developments in post colonial Africa A continental foreign policy is a tenuous proposition yet new African states emerged out of armed resistance and advocacy from regional allies such as the Bandung Conference and the League of Arab States Ghana was the first Sub Saharan African country to gain independence in 1957 Fourteen more countries gained independence in 1960 alone and by May 1963 when the Organisation of African Unity OAU was formed 30 countries were independent An early OAU committee was the African Liberation Committee ALC

tasked to work in the Frontline States FLS to support independence in Southern Africa Pan Africanists in alliance with Brazzaville Casablanca and Monrovia groups approached continental unity differently and regionalism continued to be a major feature Africa's challenges were often magnified by the capitalist democratic versus communist socialist bloc rivalry but through Africa's use and leveraging of IGOs the UN UNDP UNECA GATT NIEO and others to advance development the formation of the African Economic Community OAU's evolution into the AU and other alliances belied collective actions even as Africa implemented decisions that required cooperation *uti possidetis* maintaining colonial borders containing secession intra and inter state conflicts rebellions and building RECs and a united Africa as envisioned by Pan Africanists worked better collectively

Modeling Bilateral International Relations X. Liu, 2016-04-30 Drawing on political choice theories in IR and policy decision making this book provides a deep theoretical understanding of bilateral co operation and confrontation Through conceptual modelling and quantitative data analysis Liu examines how changes in political and economic issues affected relations between China and the United States

Handbook of International Relations Walter Carlsnaes, Thomas Risse, Thomas Risse-Kappen, Beth A Simmons, 2002 NEW IN PAPERBACK FEBRUARY 2005 The most systematic and wide ranging survey of the multi faceted field of International Relations yet produced It is sure to become a standard reference work and teaching text and is unlikely to be superseded at any time in the near future It should be considered as essential reading International Affairs The Handbook of International Relations published 2002 in hardback quickly established itself as the benchmark volume providing a state of the art review and indispensable guide to the study of international relations It is now released in paperback in order to be accessible to students in classroom use Divided into three parts the volume reviews both the historical philosophical analytical and normative roots to the discipline and the key contemporary topics of research and debate today The first part introduces the major approaches within the field and unpacks many of the on going debates within the discipline including those between rationalist and constructivist approaches The second part moves on to explore the key concepts and contextual factors important to the subject from concepts like the state and power to international and transnational actors debates around globalization and contending feminist perspectives The final part reviews a number of the key substantive issues in international relations and is designed to complement the analytical tools and perspectives presented in Parts I and II Examples of the many topics included are foreign policy war and peace security nationalism and ethnicity finance trade development the environment and human rights

Renegades Regimes and Foreign Policy Crises Balkan Devlen, 2008 The main puzzle that leads me to conceive this project is the seemingly irrational behavior of certain leaders like Slobodan Milosevic and Saddam Hussein during crises with the US Why did they risk war with the United States while the odds are clearly against them Why do they sometimes escalate the crisis to the point of war and sometimes seek conciliation and settlement Therefore the central question of this study is what are the dynamics behind the foreign policy behavior of renegade regimes rogue states during crises The cases include crises with Iraq 1991 Serbia

1999 and North Korea 1994 I created a theoretical framework that brings together psychological theories of foreign policy analysis and rational choice models and incorporates systemic and domestic constraints that leaders face to analyze their foreign policy behavior This book is primarily directed towards researchers interested in foreign policy international security and rogue states Policymakers in the foreign policy community journalists and people who are interested in how can we deal with emerging threats to peace and security hopefully would find this book helpful and informative *Explaining Germany's and Japan's Reticence to Assume Regional Security and Political Leadership Roles Befitting Their Economic Status in the Post-cold War Era* Roberta N. Haar,1998 *Foreign Policy Analysis* Laura Neack,Jeanne A. K. Hey,Patrick Jude Haney,1995 Through a broad reaching collection of readings this text illustrates the second generation scholarship in foreign policy analysis It adopts a quantitative and positivist approach using real world examples and theoretical discussions to help bridge the theory and practice of foreign policy *Effect of the strong economic growth in Ethiopia on its neighborcountry relations* Alexander Ritter,2017-11-07 Seminar paper from the year 2016 in the subject Politics Region Africa grade 2 0 University Witten Herdecke Wirtschaftswissenschaften course Comparative Analysis of Foreign Policies language English abstract This essay analyses and interprets changes in foreign relations between Ethiopia and its neighbor states dependent on Ethiopia s strong economic growth in recent years The author bases his analysis on the rational actor model of foreign policy analysis Ethiopia s economic growth is strongly tied to its investments in agriculture and electricity from hydropower which not only creates opportunities for the region but also causes some negative externalities The treat of water deficiency is particularly high for Egypt which largely depends on the waters of the Nile with its supply being threatened by the completion of the Grand Ethiopian Renaissance Dam GERD in 2017 Water politics with regards to foreign policy in addition to domestic conflict potentials are the most significant political challenges for Ethiopia today The rational choice model will help to identify these challenges in greater detail and country specifically and will help to provide solutions for informed decision making *Understanding Foreign Policy Decision Making* Alex Mintz,Karl DeRouen Jr,2010-02-22 Understanding Foreign Policy Decision Making presents a psychological approach to foreign policy decision making This approach focuses on the decision process dynamics and outcome The book includes a wealth of extended real world case studies and examples that are woven into the text The cases and examples which are written in an accessible style include decisions made by leaders of the United States Israel New Zealand Cuba Iceland United Kingdom and others In addition to coverage of the rational model of decision making levels of analysis of foreign policy decision making and types of decisions the book includes extensive material on alternatives to the rational choice model the marketing and framing of decisions cognitive biases and domestic cultural and international influences on decision making in international affairs Existing textbooks do not present such an approach to foreign policy decision making international relations American foreign policy and comparative foreign policy *The Department of State and American Diplomacy* Robert Goehlert,Elizabeth R. Hoffmeister,1986

International System and Foreign Policy Approaches Raymond Tanter,1971 The study compares an international system approach and a foreign policy approach to the study of alliance behavior in conflict situations The Berlin Conflict of 1961 provides a case in which the study explores an event interaction model an organizational process model and a combination of both As hypothesized the organizational processes model is more valid than the other models in the pre and post crisis phases of the Berlin Conflict of 1961 The combined model is more relevant during the crisis phase The results have implications for conflict modelling With respect to conflict management there is an important implication Since the organizational processes model may be more valid than an event interaction model then conflict managers in situations like Berlin 1961 should be sensitized to the role of organizational factors in determining outcomes The study however does not test hypotheses concerning organizational decision making The study does suggest that a computer based model of decision making would be a useful tool for conflict management preliminary version of which is the Computer Aided Conflict Information System Using expert judgments to describe conflicts CACIS compares prior situations with a present conflict and evaluates the consequences of policy alternatives previously employed In addition the system allows for the creation of simulated conflict scenarios The system thus could expand the political options available to decision makers Author *The Restructuring of Thailand's Foreign Policy Towards Laos, 1988-1991* David D.
