Marais, 2017-01-06 This edited volume explores the role of postcolonial translation studies in addressing issues of the postcolony It investigates the retention of the notion of postcolonial translation studies and whether one could reconsider or adapt the assumptions and methodologies of postcolonial translation studies to a new understanding of the postcolony to question the impact of postcolonial translation studies in Africa to address pertinent issues The book also places the postcolony in historical perspective and takes a critical look at the failures of postcolonial approaches to translation studies

**English Studies Beyond the 'Center'** Myles Chilton, 2015-11-06 This book addresses the shape of English studies beyond the center by analyzing how the discipline has developed and by considering how lessons from this analysis relate to the discipline as a whole The book aims to open a cross disciplinary conversation about the nature of the English major in both non Anglophone and Anglophone countries by addressing the tensions between language and literature pedagogy the relevance of a focus on hyper canonical Anglophone literature in a world of global Englishes world literature and multilingual students and by reflecting on the necessary contingency and cross purposes of blended literature and language classrooms Many of the book's points of discussion arise from the author's experience as an English professor in Japan where the particularities of English language and literature pedagogy raise significant challenges to Anglo centric critical and pedagogical assumptions English Studies Beyond the Center Teaching Literature and the Future of Global English therefore

argues that English literature must make a case for itself by understanding its place in a newly configured discipline. Issues discussed in the book include English language and literature pedagogy in Japan. The modes through which EFL and English literary studies converge and diverge. Globalized English beyond the Anglo American perspective. English classroom practices particularly in Japan. Beyond Post-colonialism. The construction of Identities Through Muting and Absenting of the Other. Ahmed Musa, 2021-07-19. Essay from the year 2021 in the subject Cultural Studies Middle Eastern Studies grade 95 language English abstract. This paper is an attempt to trace the absence of the West in the cultural creative modes of knowledge productions that emerged post the Arab social movements in Tunisia and Egypt. Whenever we discuss or approach the subject of the construction of identities in post colonial studies the West who I represent here as the other is largely but not entirely perceived as consolidating against or formulating the identities of the East or the identities of the Rest. This is evident in not only the revered works of prominent theorists like Edward Said Homi Bhabha and Gayatri Spivak but also in the works of other post colonial theorists and writers that emerged afterward. However during the Arab Spring one of the most solidaristic and transcultural Arab movements that searched for more stable governing models at crossroads of global regional and national challenges creative new forms of formulating identities beyond post colonial theory emerged such as the Arab Spring poetic slogans as creative modes of knowledge production which moved away from the previous discourse of the post colonial Arab intellectuals built on a bifurcation identity and also in tandem revolting the internal regimes of knowledge production. The new forms of cultural productions not only represented moments of self emergency social solidarity and construction of the self during traumatic moments but also in tandem absented and muted the West and East binaries and antithesis of representation. Postcolonialism Michael J. F. Chapman, 2008. Poses two questions. Is there a role for the literary imagination in postcolonial studies. And where may one locate South Africa or more generally South African perspectives in a field delineated primarily by northern institutional purposes and practices. *Panjab University Research Journal*, 2007. **Francophone Postcolonial Studies**, 2005. *Postcolonial Theory* Leela Gandhi, 2019-01-08. Published twenty years ago Leela Gandhi's *Postcolonial Theory* was a landmark description of the field of postcolonial studies in theoretical terms that set its intellectual context alongside poststructuralism postmodernism Marxism and feminism. Gandhi examined the contributions of major thinkers such as Edward Said Gayatri Spivak Homi Bhabha and the subaltern historians. The book pointed to postcolonialism's relationship with earlier anticolonial thinkers such as Frantz Fanon Albert Memmi Ngũgĩ wa Thiong'o and M. K. Gandhi and explained pertinent concepts and schools of thought hybridity Orientalism humanism Marxist dialectics diaspora nationalism gendered subalternity globalization and postcolonial feminism. The revised edition of this classic work reaffirms its status as a useful starting point for readers new to the field and as a provocative account that opens up possibilities for debate. It includes substantial additions. A new preface and epilogue reposition postcolonial studies within evolving intellectual contexts and take stock of important critical developments. Gandhi examines recent alliances with

critical race theory and Africanist postcolonialism considers challenges from postsecular and postcritical perspectives and takes into account the ontological environmental affective and ethical turns in the changed landscape of critical theory She describes what is enduring in postcolonial thinking as a critical perspective within the academy and as an attitude to the world that extends beyond the discipline of postcolonial studies

Postcolonial Biology Deepika Bahri, 2017-12-15 Although the body has been a vast subject for postcolonial studies few theorists have attempted to go beyond the simple mixing of races in examining the impact of colonialism on the colonized body However as Deepika Bahri argues it is essential to see the postcolonial body in a variety of forms as capable of transformation not only in psyche and outward behavior but also in flesh and blood European colonizers brought new ways of seeing the body in matters as basic as how to eat speak sit shit or spit As nations decolonized these imperialistic ideas remained becoming part of the global economy of the body In Postcolonial Biology Bahri argues that the political challenges of the twenty first century require that we deconstruct these imperial notions of the body as they are fundamental to power structures governing today s globalized world Postcolonial Biology investigates how minds and bodies have been shaped by colonial contact to create deeply embedded hierarchies among the colonized Moving beyond North South thinking Bahri reframes the questions of postcolonial bodies to address all societies whether developed or developing Engaging in innovative highly original readings of major thinkers such as Adorno Horkheimer Derrida and Fanon this book brings an important new focus to the field of postcolonial studies one that is essential to understanding the ideas and conflicts that currently dominate the global order

Beyond the Populist Moment Abdelwahab El-Affendi, 2026-02-19 Is populism invigorating or destroying modern democratic politics This landmark study explores this question moving beyond the European perspective with contributions from leading scholars engaging in this lively multiregional and multi disciplinary debate

Beyond Dichotomies Elisabeth Mudimbe-Boyi, 2012-02-01 Beyond Dichotomies examines literary texts cultural production and concrete local practices within the context of modernity and globalization by focusing on the ways in which some societies confront the complexity of cultures reflected in new forms of knowledge narratives and subjectivities The contributors explore how particular societies negotiate the relations between the global and the local and use a geographical comparative perspective combined with an interdisciplinary approach to offer a diversity of views and illuminate the cultural impact of globalization on different societies around the world Africa Asia Europe and the Americas These societies face complex questions regarding people s histories identities and cultures that embody the ambivalence contradictions and anxieties generated by the process of globalization The contributors provide a compelling conclusion for a rethinking and reconfiguration of cultures and intercultural relations in today s global world in which dichotomized representations coexist with a discourse of globalization

**Beyond Columbine** Julie A. Webber, 2017 NOW IN PAPERBACK School violence has become our new American horror story but it also has its roots in the way it comments on western values with respect to violence shame mental illness suicide humanity and the virtual Beyond

Columbine School Violence and the Virtual offers a series of readings of school shooting episodes in the United States as well as similar cases in Finland Germany and Norway among others and their relatedness The book expands the author s central premise from her earlier book Failure to Hold which explores the hidden curriculum of American culture that is rooted in perceived inequality and the shame rage and violence that it provokes In doing so it goes further to explore the United States outdated perceptual apparatus based on a reflective liberal ideology and presents a new argument about proprioception the combined effect of a sustained lack of thought non cognitive in action that is engendered by digital media and virtual culture The present interpretation of the virtual is not limited to video games but encompasses the entire perceptual field of information sharing and media stylization e g social networking television and branding More specifically American culture has immersed itself so thoroughly in a digital world that its violence and responses to violence lack reflection to the point where it confuses data with certainty School related violence is presented as a dramatic series of events with Columbine as its pilot episode

**Kwasi Wiredu and Beyond** Sanya Osha,2005 Kwasi Wiredu is one of Africa s foremost philosophers whose thinking on conceptual decolonization in contemporary African systems of thought is well known Wiredu advocates a re examination of current African epistemic formations in order to subvert unsavoury aspects of tribal cultures embedded in modern African thought as well as deconstruct the unnecessary Western epistemologies to be found in African philosophical practices In this book Sanya Osha argues that Wiredu s apparent schematism falls short as a viable project and suggests that because of the very hybridity of postcoloniality projects seeking to retrieve the precolonial heritage are bound to be marred at several levels Language itself presents a major problems which Wiredu s thesis does not fully address
