Green, Ludy T. Benjamin, 2009-12

Although sport psychology did not fully mature as a recognized discipline until the 1960s pioneering psychologists in the late nineteenth and early twentieth centuries making greater use of empirical research methodologies sought to understand mental factors that affect athletic performance. Though the psychologists behind the studies described here worked independently of one another and charted their own distinct courses of inquiry their works taken together provided the corpus of precedents and foundations on which the modern field of sport psychology was built. The essays collected in this volume tell the stories not only of these psychologists and their subjects but of the social and academic context that surrounded them shaping and being shaped by their ideas. *Subject Catalog* Library of Congress, 1982 *National Union Catalog*, 1982 Includes entries for maps and atlases **AB Bookman's Weekly**, 1994 **National Union Catalog, 1982**, 1983 **Directory of Graduate Programs in Applied Sport Psychology** Michael L.
