From Object-Oriented to Formal Methods Olaf Owe, Stein Krogdahl, Tom Lyche, 2004-03-09 After Ole Johan's retirement at the beginning of the new millennium some of us had thought and talked about making a Festschrift in his honor When Donald Knuth took the initiative by sending us the first contribution the process began to roll In early 2002 an editing group was formed including Kristen Nygaard who had known Ole Johan since their student days and with whom he had developed the Simula language Then we invited a number of prominent researchers familiar with Ole Johan to submit contributions for a book honoring Ole Johan on the occasion of his 70th birthday Invitees included several members of the IFIP 2.3 working group a forum that Ole Johan treasured and enjoyed participating in throughout his career In spite of the short deadline the response to the invitations was overwhelmingly positive The original idea was to complete the book rather quickly to make it a gift he could read and enjoy because by then he had had cancer for three years and his health was gradually deteriorating Kristen had been regularly visiting Ole Johan who was in the hospital at that time and they were working on their Turing award speech Ole Johan was gratified to hear about the contributions to this book but modestly expressed the feeling that there was no special need to undertake a book project on his behalf Peacefully accepting his destiny Ole Johan died on June 29, 2002

Jack C. High, Don Lavoie, 2006-10-27 Don Lavoie's published work encompassed a wide range of subjects: socialism, hermeneutics, information technology, and culture. The subjects appear unrelated, but a close examination of his research reveals an underlying unity of thought and an economics at sharp variance with the post-World War II mainstream. By linking economics to other disciplines, Lavoie demonstrated that economics is closer to the humanities than to the physical sciences. The contributors to this volume explore Don Lavoie's legacy and its implications for economics. **Computer Science J.**
