Advanced Intelligent Systems for Sustainable Development (AI2SD'2019) Mostafa Ezziyyani,2020-01-03 This book summarizes the latest research on advanced intelligent systems in the fields of energy and electrical engineering presented at the second edition of the International Conference on Advanced Intelligent Systems for Sustainable Development AI2SD 2019 held in Marrakech from 8 to 11 July 2019 Morocco This book is intended for researchers professionals and anyone interested in the development of advanced intelligent systems in the electrical engineering sector The solutions featured focus on three main areas motion control in complex electromechanical systems including sensorless control fault diagnosis and fault tolerant control of electric drives and new control algorithms for power electronics converters In addition the book includes a range of research using new technologies and advanced approaches Offering a platform for researchers in the field of energy to share their work related to the problem of management and optimization of energy which is a major current concern the book mainly focuses on areas that go hand in hand with the Industrial Revolution 4.0 such as solar energy computing systems smart grids hydroelectric power computing systems thermal and recycling computing systems eco design intelligent computing systems renewable energy for IT equipment modeling green technology and renewable energy systems in smart cities The authors of each chapter report the state of the art in the topics addressed and the results of their own research laboratory experiments and successful applications in order to share the concept of advanced intelligent systems and appropriate tools and techniques for modeling storage management as well as decision support in the field of electrical engineering Further the book discusses a number of future trends and the potential for linking control theory power electronics artificial neural networks embedded controllers and signal processing

Landfill Leachate Treatment Techniques Salah Souabi,Abdelkader Anouzla,2024 This book is a ready reckoner of recent information regarding the impact of leachate landfills leachate treatment and heavy metals on a single platform The amount of waste is constantly growing due to population growth and the evolution of socioeconomic activities Burying this waste produces leachate a contaminated effluent created during the decomposition of organic waste and containing harmful substances like heavy metals polyphenols volatile organic compounds and microorganisms These effluents emit unpleasant odors associated with ammonium ions These discharges significantly impact the environment As a result the master s and doctoral academics researchers and students will be able to comprehend the most recent developments in municipal solid waste landfill operations supporting their research This book inspires readers on how to deal with environmental pollution problems due to leachate contamination in freshwater and agricultural soils using a variety of technologies

Recent Advances in Environmental Science from the Euro-Mediterranean and Surrounding Regions Amjad Kallel,Mohamed Ksibi,Hamed Ben Dhia,Nabil Khélifi,2017-12-12 This volume includes the papers presented during the 1st Euro Mediterranean Conference for Environmental Integration EMCEI which was held in Sousse Tunisia in November 2017 This conference was jointly organized

by the editorial office of the Euro Mediterranean Journal for Environmental Integration in Sfax Tunisia and Springer MENA Publishing Program in Germany It aimed to give a more concrete expression to the Euro Mediterranean integration process by supplementing existing North South programs and agreements with a new multilateral scientific forum that emphasizes in particular the vulnerability and proactive remediation of the Euro Mediterranean region from an environmental point of view This volume gives a general and brief overview on current research focusing on emerging environmental issues and challenges and its applications to a variety of problems in the Euro Mediterranean zone and surrounding regions It contains over five hundred and eighty carefully refereed short contributions to the conference Topics covered include 1 innovative approaches and methods for environmental sustainability 2 environmental risk assessment bioremediation ecotoxicology and environmental safety 3 water resources assessment planning protection and management 4 environmental engineering and management 5 natural resources characterization assessment management and valorization 6 intelligent techniques in renewable energy biomass wind waste solar 7 sustainable management of marine environment and coastal areas 8 remote sensing and GIS for geo environmental investigations 9 environmental impacts of geo natural hazards earthquakes landslides volcanic and marine hazards and 10 the environmental health science natural and social impacts on Human health Presenting a wide range of topics and new results this edited volume will appeal to anyone working in the subject area including researchers and students interested to learn more about new advances in environmental research initiatives in view of the ever growing environmental degradation in the Euro Mediterranean region which has turned environmental and resource protection into an increasingly important issue hampering sustainable development and social welfare

Resource Recovery from Wastewater Treatment Giorgio Mannina,Alida Cosenza,Antonio Mineo,2024-06-17 This volume highlights the latest advances innovations and applications in the field of water resource recovery from water treatment as presented by leading researchers at the International Conference on Wider Uptake of Water Resource Recovery from Wastewater Treatment ICWRR held in Palermo Italy on June 18 21 2024 The event took place together with the 7th IWA Regional Membrane Technology Conference IWA RMTC The contributions cover a wide range of themes from innovative and nature based solutions for water and wastewater management to circularity assessment tools and environmental policy and legislation The topics include resource recovery from wastewater wastewater treatment membrane bioreactors greenhouse gases from wastewater treatment LCA water reuse rainwater harvesting mathematical modelling of wastewater treatment plants metagenomics analysis and environmental microbiology environmental policy and legislation in the water sector plant water soil nexus fertilizers from wastewater The contributions were selected by means of a rigorous peer review process and highlight many exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different water specialists

This book delves into Optimization Of Coagulation Flocculation Process With. Optimization Of Coagulation Flocculation Process With is an essential topic that must be grasped by everyone, ranging from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Optimization Of Coagulation Flocculation Process With, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:
 - Chapter 1: Introduction to Optimization Of Coagulation Flocculation Process With
 - Chapter 2: Essential Elements of Optimization Of Coagulation Flocculation Process With
 - Chapter 3: Optimization Of Coagulation Flocculation Process With in Everyday Life
 - Chapter 4: Optimization Of Coagulation Flocculation Process With in Specific Contexts
 - Chapter 5: Conclusion
2. In chapter 1, this book will provide an overview of Optimization Of Coagulation Flocculation Process With. The first chapter will explore what Optimization Of Coagulation Flocculation Process With is, why Optimization Of Coagulation Flocculation Process With is vital, and how to effectively learn about Optimization Of Coagulation Flocculation Process With.
3. In chapter 2, this book will delve into the foundational concepts of Optimization Of Coagulation Flocculation Process With. The second chapter will elucidate the essential principles that need to be understood to grasp Optimization Of Coagulation Flocculation Process With in its entirety.
4. In chapter 3, the author will examine the practical applications of Optimization Of Coagulation Flocculation Process With in daily life. The third chapter will showcase real-world examples of how Optimization Of Coagulation Flocculation Process With can be effectively utilized in everyday scenarios.
5. In chapter 4, this book will scrutinize the relevance of Optimization Of Coagulation Flocculation Process With in specific contexts. The fourth chapter will explore how Optimization Of Coagulation Flocculation Process With is applied in specialized fields, such as education, business, and technology.
6. In chapter 5, this book will draw a conclusion about Optimization Of Coagulation Flocculation Process With. This chapter will summarize the key points that have been discussed throughout the book.
The book is crafted in an easy-to-understand language and is complemented by engaging illustrations. This book is highly recommended for anyone seeking to gain a comprehensive understanding of Optimization Of Coagulation Flocculation Process With.
