Cognitive sources of information - ANSWER-  (top-down, apperceptual) sources of information coming from memory, knowledge and experience

Perceptual sources of information - ANSWER-  (bottom-up) sources of information coming from current sensory data in the environment

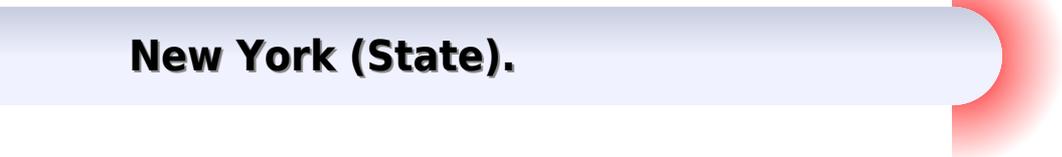

Connectionist approaches - ANSWER-  The metaphor of the mind as a parallel network of neuron-like computing elements.....nodes/links like a semantic network but operate very differently, modeled after neural network is the nervous system but it not a model on how the nervous system works includes excitatory/ inhibitory connections, strength of firing, distributed coding

Information processing view of cognition - ANSWER-  an approach to the study of mental structures and processes that uses the computer as a model for human thinking; filling memories

Marr's levels of analysis - ANSWER-  Marr's three levels of analysis [1] promotes the idea that complex systems such as the brain, a computer or human behaviour should be understood at different levels. Marr's framework proved to be an elegant and popular way of reasoning about complex systems, and in the context of machine learning and statistics, remains an intuitive framework that is often used when describing probabilistic models of cognition and perceptual systems.
