Environment Abstracts Annual ,1992 This database encompasses all aspects of the impact of people and technology on the environment and the effectiveness of remedial policies and technologies featuring more than 950 journals published in the U S and abroad The database also covers conference papers and proceedings special reports from international agencies non governmental organizations universities associations and private corporations Other materials selectively indexed include significant monographs government studies and newsletters

Coaching methodology for sport coaches The NEETs Need sport Partnership,2023-05-25 The purpose of this material is to give sports coaches more insights into how sports are delivered for and experienced by youth who could be considered socially vulnerable The information and methods recommended will develop sports coaches youth workers understanding of how organised sports as

a series of social relationships and processes can contribute to making socially vulnerable youth less vulnerable Project Background Youth unemployment in the EU is at 16.9% this accounts for about 3.4 million unemployed young people in the EU The rate of EU adult employment is 9.3% this is almost half the unemployment rate of youth The NEETs Need sport project aims to tackle these statistical barriers that EU youth are facing by increasing the employability of marginalized young people who are not in employment education or training NEETs through developing a set of training tools for youth workers sport coaches This project will use sport as a learning tool through interactive fun and educational development activities delivered efficiently to young people Co funded by Erasmus

Meditation – Neuroscientific Approaches and Philosophical Implications Stefan Schmidt, Harald Walach, 2013-11-19 This volume features a collection of essays on consciousness which has become one of the hot topics at the crossroads between neuroscience philosophy and religious studies Is consciousness something the brain produces How can we study it Is there just one type of consciousness or are there different states that can be discriminated Are so called higher states of consciousness that some people report during meditation pointing towards a new understanding of consciousness Meditation research is a new discipline that shows new inroads into the study of consciousness If a meditative practice changes brain structure itself this is direct proof of the causal influence of consciousness onto its substrate If different states of consciousness can be linked with properties and states of the brain this can be used to study consciousness more directly If the sense of self is modifiable through meditative techniques and this can be objectively shown through neuro imaging this has profound implications for our understanding of who we are Can consciousness in deep states of meditative absorption actually access some aspect of reality which we normally don't Meditation research can potentially foster us with a new access to the phenomenological method in general This has even been branded with a new catch phrase Contemplative Science It brings together the most modern neuroscientific approach and the most advanced phenomenological methodology of studying the mind from within through highly skilled self observation that has gone through many thousand hours of honing the capacity to look carefully without distraction This book addresses these issues by bringing together some of the leading researchers and thinkers in the field The scope of the volume reaches from first person neuroscience to Indian philosophy from pedagogic applications to epistemological aspects and from compassion meditation to the study of brain activity *The Routledge International Handbook of Creative Cognition* Linden J. Ball, Frédéric Vallée-Tourangeau, 2023-08-31 The Routledge International Handbook of Creative Cognition is an authoritative reference work that offers a well balanced overview of current scholarship across the full breadth of the rapidly expanding field of creative cognition It contains 43 chapters written by world leading researchers covering foundational issues and concepts as well as state of the art research developments The handbook draws extensively on contemporary work exploring the cognitive representations and processes associated with creativity whether studied in the laboratory or as it arises in real world practice in domains such as education art science

entrepreneurship design and technological innovation Chapters also examine the sociocognitive and cultural aspects of creativity in teams and organisations while additionally capturing the latest research on the cognitive neuroscience of creativity Providing a compelling synopsis of emerging trends and debates in the field of creative cognition and positioning these in relation to established findings and theories this text provides a clear sense of the way in which new research is challenging traditional viewpoints It is an essential reading for researchers in the field of creative cognition as well as advanced students wishing to learn more about the latest developments in this important and rapidly growing area of enquiry
