**Managing Data in Motion** April Reeve, 2013-02-26 *Managing Data in Motion* describes techniques that have been developed for significantly reducing the complexity of managing system interfaces and enabling scalable architectures. Author April Reeve brings over two decades of experience to present a vendor neutral approach to moving data between computing environments and systems. Readers will learn the techniques, technologies, and best practices for managing the passage of data between computer systems and integrating disparate data together in an enterprise environment. The average enterprise's computing environment is comprised of hundreds to thousands of computer systems that have been built, purchased, and acquired over time. The data from these various systems needs to be integrated for reporting and analysis, shared for business transaction processing, and converted from one format to another when old systems are replaced and new systems are acquired. The management of the data in motion in organizations is rapidly becoming one of the biggest concerns for business and IT management. Data warehousing and conversion, real-time data integration, and cloud and big data applications are just a few of the challenges facing organizations and businesses today. *Managing Data in Motion* tackles these and other topics in a style easily understood by business and IT managers as well as programmers and architects. Presents a vendor neutral overview of the different technologies and techniques for moving data between computer systems, including the emerging solutions for unstructured as well as structured data types. Explains in non-technical terms the architecture and components required to perform data integration. Describes how to reduce the complexity of managing system interfaces and enable a scalable data architecture that can handle the dimensions of Big Data. **Data**

**Warehousing and Knowledge Discovery** Alfredo Cuzzocrea, Umeshwar Dayal, 2011-08-19 This book constitutes the refereed proceedings of the 13th International Conference on Data Warehousing and Knowledge Discovery DaWak 2011 held in Toulouse, France, in August-September 2011. The 37 revised full papers presented were carefully reviewed and selected from 119 submissions. The papers are organized in topical sections on physical and conceptual data warehouse models, data warehousing design, methodologies, and tools, data warehouse performance and optimization, pattern mining, matrix-based mining techniques, and stream sensor and time series mining. **Data Warehouse and Data Mining** Dr. Jugnesh

Kumar, 2024-01-25 *Unveiling Insights: Unleashing Potential* Navigating the depths of data warehousing and mining for a data-driven tomorrow. **KEY FEATURES** Explore concepts ranging from fundamentals to advanced techniques of data warehouses and data mining. Translate business questions into actionable strategies to make informed decisions. Gain practical implementation guidance for hands-on learning. **DESCRIPTION** Data warehouse and data mining are essential technologies in the field of data analysis and business intelligence. Data warehouse provides a centralized repository of structured data and facilitates data storage and retrieval. Data mining, on the other hand, utilizes various algorithms and techniques to extract valuable patterns, trends, and insights from large datasets. The book explains the ins and outs of data warehousing by

discussing its principles benefits and components differentiating it from traditional databases The readers will explore warehouse architecture learn to navigate OLTP and OLAP systems grasping the crux of the difference between ROLAP and MOLAP The book is designed to help you discover data mining secrets with techniques like classification and clustering You will be able to advance your skills by handling multimedia time series and text staying ahead in the evolving data mining landscape By the end of this book you will be equipped with the skills and knowledge to confidently translate business questions into actionable strategies extracting valuable insights for informed decisions

**WHAT YOU WILL LEARN** Designing and building efficient data warehouses Handling diverse data types for comprehensive insights Mastering various data mining techniques Translating business questions into mining strategies Techniques for pattern discovery and knowledge extraction
