The goal of this book is to introduce D3.js and provide a learning path so that you obtain a solid understanding of its fundamental concepts, learn to use most of its modules and functions, and gain enough experience to create your own D3.js visualizations. You will learn how to create bar, line, pie, and scatter charts, trees, dendrograms, treemaps, circle packs, chord, ribbon diagrams, sankey diagrams, animated network diagrams, and maps using different geographical projections. Fundamental concepts are explained in each chapter and then applied to a larger example in step-by-step tutorials, complete with full code from hundreds of examples you can download and run. This book covers D3.js version 5 and is based on ES2015 JavaScript. What you will learn: Learn to use D3.js version 5 and web standards to create beautiful, interactive, data-driven visualizations for the web. Bind data to DOM elements, applying different scales, color schemes, and configuring smooth, animated transitions for data updates. Generate data structures and layouts for many popular chart formats. Apply interactive behaviors to any chart. Create thematic maps based on GIS data using different geographical projections with interactive behaviors. Load, parse, and transform data from JSON and CSV formats. Who this book is for: The book is intended for web developers, web designers, data scientists, artists, and any developer who wishes to create interactive data visualization for the web using D3.js.
