Fadipe, 2022-06-14 This volume examines how African indigenous popular music is deployed in democracy politics and for social crusades by African artists Exploring the role of indigenous African popular music in environmental health communication and gender empowerment it subsequently focuses on how the music portrays the African future its use by African youths and how it is affected by advanced broadcast technologies and the digital media Indigenous African popular music has long been underappreciated in communication scholarship However understanding the nature and

philosophies of indigenous African popular music reveals an untapped diversity which can only be unraveled by the knowledge of myriad cultural backgrounds from which its genres originate With a particular focus on scholarship from Nigeria Zimbabwe and South Africa this volume explores how during the colonial period and post independence dispensation indigenous African music genres and their artists were mainstreamed in order to tackle emerging issues to sensitise Africans about the affairs of their respective nations and to warn African leaders who have failed and are failing African citizenry about the plight of the people At the same time indigenous African popular music genres have served as a beacon to the teeming African youths to express their dreams frustrations about their environments and to represent themselves This volume explores how through the advent of new media technologies indigenous African popular musicians have been working relentlessly for indigenous production becoming champions of good governance marginalised population and repositories of indigenous cultural traditions and cosmologies *African-Language Literatures* Innocentia Jabulisile Mhlambi,2012-06-01 African language writing is in crisis The conditions under which African writing developed in the past only remotely similar to those of Western models resulted in an inability of Eurocentric literary models to explore the hermeneutic world of African language poetics inherited from the oral and the modern worlds Existing modes of criticism in the study of this literary tradition are often unsuited for a nuanced understanding of the intrinsic and extrinsic aspects at play in the composition production and reading of these literatures In *African Language Literatures* Innocentia Jabulisile Mhlambi charts new directions in the study of African language literatures generally and isiZulu fiction in particular by proposing that African popular arts and culture models be considered as a logical solution to current debates and challenges Mhlambi shows how the popular arts and culture approach brings into relationship the oral and written forms the local and the international and elitist and popular genres and locates and places the resultant emerging eclectic culture into its socio historical context She uses this theoretical approach to explore in a wide range of cultural products what matters or what is of interest to the people irrespective of social hierarchies and predispositions It is her contention that in profound ways the African language literary tradition evinces diversity complexity and fluidity and that this should be seen as an invitation to look at systems of meaning which do not hide their connections with the facts of power and material life *South & Southern African Literature* Eldred D. Jones,Marjorie Jones,2002 The end of the apartheid in South Africa has meant that the literature of protest need no longer dominate creative output This title looks at the realities of independent African nations as expressed in song and literature *Radio, Public Life and Citizen Deliberation in South Africa* Sarah Chiumbu,Gilbert Motsaathebe,2021-05-24 This book critically analyses the important role of radio in public life in post apartheid South Africa As the most widespread and popular form of communication in the country radio occupies an essential space in the deliberation and the construction of public opinion in South Africa From just a few state controlled stations during the apartheid era there are now more than 100 radio stations reaching vast swathes of the population and providing an

important space for citizens to air their views and take part in significant socio economic and political issues of the country The various contributors to this book demonstrate that whilst print and television media often serve elite interests and audiences the low cost and flexibility of radio has helped it to create a common space for national dialogue and deliberation The book also investigates the ways in which digital technologies have enhanced the consumption of radio and produced a sense of imagined community for citizens including those in marginalised communities and rural areas This book will be of interest to researchers with an interest in media politics and culture in South Africa specifically as well as those with an interest in broadcast media more generally
