Erickson,2023-02 **PROGRAMMABLE LOGIC CONTROLLER** PEng. Emmanuel Pregrino Mgisha,2024-05-05 The programmable logic controller represents a key factor in industrial automation because before programmable logic controllers manufacturing plants employed relay based circuitry to energise different loads based on how the relays were wired together The circuit patterns used for these drawings are known as ladder diagrams Relays were costly required constant maintenance and could not be easily reconfigured As PLCs took over this process it was essential to maintain a similarity to the old system thus ladder logic was created as the first PLC programming language Ladder logic is one of the top 5 most popular types of PLC programming languages used in various module syllabuses in various fields of Engineering courses including Electrical Electronics Telecommunications Mechanical Mechatronics Electromechanical Oil and Gas Ship Building and Marine Engineering Pneumatic and Hydraulic Systems to design various projects and systems in various areas including domestic residence industrial systems control of machinery commercial mining sector aircraft electric vehicles marine automation power stations power substations electric train and railway electrification systems etc [Allen-Bradley PLCs](#) Kelvin T.
