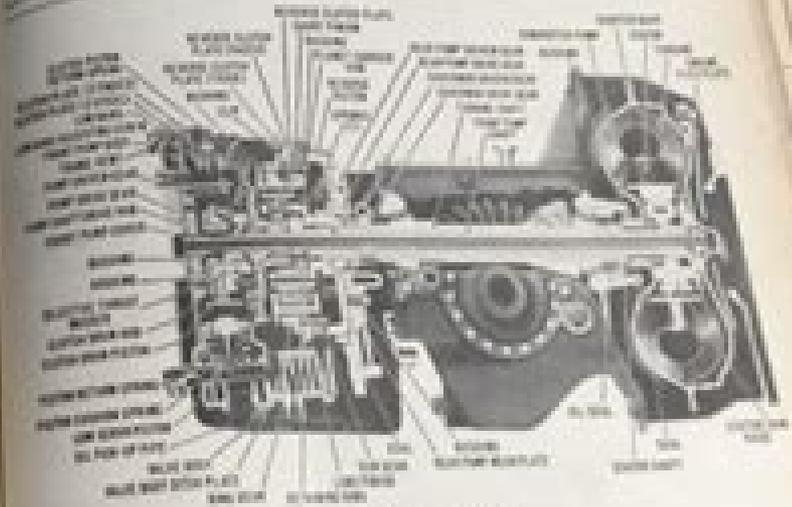

Fig. 1. Powerglide

DESCRIPTION

The Corvair Powerglide transmission is a four-speed manual transmission. It is designed to provide smooth shifting and efficient power transfer from the engine to the rear axle. The transmission consists of a housing, input shaft, output shaft, and various gears and bearings. The input shaft is connected to the engine via the clutch, and the output shaft is connected to the rear axle. The gears are arranged in a planetary configuration, allowing for smooth shifting between the four forward gears and reverse.

MAINTENANCE

Adding Oil
The Corvair Powerglide transmission requires regular oil changes to ensure proper lubrication and smooth operation. The recommended oil is a high-quality motor oil with a viscosity of 75W-90. The oil level should be checked regularly and topped off as needed. The oil should be changed every 5,000 miles or every 6 months, whichever comes first. The oil change procedure involves draining the old oil, cleaning the housing, and adding the new oil to the correct level. The oil level is indicated by a dipstick located on the side of the housing.
