Standards for Personal Financial Literacy* Wisconsin. Department of Public Instruction,2006 Financial Literacy and Stock
Market Participation Maarten van Rooij,Annamaria Lusardi,Rob Alessie,2007 Individuals are increasingly put in charge of
their financial security after retirement Moreover the supply of complex financial products has increased considerably over
the years However we still have little or no information about whether individuals have the financial knowledge and skills to
navigate this new financial environment To better understand financial literacy and its relation to financial decision making
we have devised two special modules for the DNB Household Survey We have designed questions to measure numeracy and
basic knowledge related to the working of inflation and interest rates as well as questions to measure more advanced
financial knowledge related to financial market instruments stocks bonds and mutual funds We evaluate the importance of
financial literacy by studying its relation to the stock market Are more financially knowledgeable individuals more likely to
hold stocks To assess the direction of causality we make use of questions measuring financial knowledge before investing in
the stock market We find that while the understanding of basic economic concepts related to inflation and interest rate
compounding is far from perfect it outperforms the limited knowledge of stocks and bonds the concept of risk diversification
and the working of financial markets We also find that the measurement of financial literacy is very sensitive to the wording

of survey questions This provides additional evidence for limited financial knowledge Finally we report evidence of an independent effect of financial literacy on stock market participation Those who have low financial literacy are significantly less likely to invest in stocks Spark ,2012 **The Writer's Market** Aron M.
