An Invitation to Real Analysis Luis F. Moreno, 2015-05-17 An Invitation to Real Analysis is written both as a stepping stone to higher calculus and analysis courses and as foundation for deeper reasoning in applied mathematics This book also provides a broader foundation in real analysis than is typical for future teachers of secondary mathematics In connection with this within the chapters students are pointed to numerous articles from The College Mathematics Journal and The American Mathematical Monthly These articles are inviting in their level of exposition and their wide ranging content Axioms are presented with an emphasis on the distinguishing characteristics that new ones bring culminating with the axioms that define the reals Set theory is another theme found in this book beginning with what students are familiar with from basic calculus This theme runs underneath the rigorous development of functions sequences and series and then ends with a chapter on transfinite cardinal numbers and with chapters on basic point set topology Differentiation and integration are developed with the standard level of rigor but always with the goal of forming a firm foundation for the student who desires to pursue deeper study A historical theme interweaves throughout the book with many quotes and accounts of interest to all readers Over 600 exercises and dozens of figures help the learning process Several topics continued fractions for example are included in the appendices as enrichment material An annotated bibliography is included

Human-Centered Solutions and Synergies across Robotic and Digital Systems for Rehabilitation Giacinto Barresi, Ana Lúcia Faria, Marta Matamala-Gomez, Edward Grant, Philippe Archambault, Giampaolo Bricchetto, Thomas Platz, 2024-11-18 Rehabilitation the progressive restoration of lost human functions must be effective personalized clinically compliant and engaging while obtaining maximum results with minimal allocation of resources it must be tailored to each patient's needs it must comply with the medical protocol and it must engage the patient to perform the expected exercises activities In order to achieve such objectives interaction technologies offer a wider range of solutions every year more versatile more impactful In this context robots and digital systems constitute groundbreaking opportunities for innovation in rehabilitation especially through their adoption of artificial intelligence technologies For instance they can work as theranostic machines by means of their capability of collecting and analysing valuable data through this they can evaluate the rehabilitation outcome improve diagnostic processes and offer new insights on clinical conditions and methodologies while they guide the person in training and re training procedures
