book contains a collection of scientific chapters addressing the emerging trends in IT and telecommunications as well as the issues that accompany them in business. It addresses issues in cyber applications, ICT solutions, and innovative cyber know-how and demonstrates how high-tech IT communications resources can be used to improve business production, sales, and service strategies, supply chains, and logistics. The book is based on articles from ICCMIT 20, extending their approach to specific chapters. The chapters cover issues such as financial management, technological upgrades, Industry 4.0, and the trend towards sustainable development. It utilizes examples of technologically advanced enterprises developing under Industry 4.0 assumptions at the stage of digital transformation, which integrate digital technologies and business processes. In addition, this book discusses issues related to cyber risk management and the implementation of a number of safeguards for digitized enterprises. Enterprises that orient themselves towards technological innovations find that they can reach customers faster, are more effectively managed, and can achieve a competitive advantage over other businesses. This book will be a great aid to professionals in such companies, both in IT departments and in the management team.

South Asia's Transition from Agrarian to Industrialized Economy Kazuo Tomozawa, Koichi Fujita, 2024-12-23. This book analyses the transition of South Asian nations from agrarian to industrialized economies, which is accompanied by a widening gap between agricultural and non-agricultural growth rates and a greater income disparity between farmers and urban residents. The chapters, contributed by experts in the field, analyze various issues in the transitional process of economic development in South Asia, focusing mainly on India's agricultural adjustment problem and the issues concerning industrial sectors. The book deals first with challenges related to the farmers' struggles, including traders and processors, and how they can adapt to the more sophisticated market demand for their products, emerging mainly in urban areas or even abroad. It then focuses on the developments in the non-agricultural sector, introducing a global value chain (GVC) perspective. It finally analyses trends in labor migration and labor markets closely linked to the agricultural and non-agricultural sectors. This book is a valuable addition to the field of Development Economics and South Asian Economics.

OECD Capital Market Series: OECD Capital Market Review of the Philippines 2024 OECD, 2024-12-10. Capital markets can be powerful levers to mobilise funds for economic growth. This report assesses the Philippine capital market and provides recommendations to improve it by strengthening corporate governance, facilitating access to public equity markets, increasing liquidity in the secondary stock market, improving market-based debt financing via corporate bonds, and deepening the investor base. The recommendations are intended to guide policy makers in their reform agenda to strengthen the Philippine capital market and boost economic growth.
