Advances in Computing and Data Sciences Mayank Singh, Vipin Tyagi, P. K. Gupta, Jan Flusser, Tuncer Ören, V. R. Sonawane, 2021-10-20 This two volume book constitutes the post conference proceedings of the 5th International Conference on Advances in Computing and Data Sciences ICACDS 2021 held in Nashik India in April 2021 The 103 full papers were carefully reviewed and selected from 781 submissions Part II is devoted to data sciences organizing principles medical technologies computational linguistics etc The conference was held virtually due to the COVID 19 pandemic eBook: Database Systems Concepts 6e SILBERSCHATZ, 2010-06-16 eBook Database Systems Concepts 6e **Hadoop For Dummies** Dirk deRoos, 2014-03-21 Let Hadoop For Dummies help harness the power of your data and rein in the information overload Big data has become big business and companies and organizations of all sizes are struggling to find ways to retrieve valuable information from their massive data sets with becoming overwhelmed Enter Hadoop and this easy to understand For Dummies guide Hadoop For Dummies helps readers understand the value of big data make a business case for using Hadoop navigate the Hadoop ecosystem and build and manage Hadoop applications and clusters Explains the origins of Hadoop its economic benefits and its functionality and practical applications Helps you find your way around the Hadoop ecosystem program MapReduce utilize design patterns and get your Hadoop cluster up and running quickly and easily Details how to use Hadoop applications for data mining web analytics and personalization large scale text processing data science and problem solving Shows you how to improve the value of your Hadoop cluster maximize your investment in Hadoop and avoid common pitfalls when building your Hadoop cluster From programmers challenged with building and maintaining affordable scaleable data systems to administrators who must deal with huge volumes of information effectively and efficiently this how to has something to help you with Hadoop doe human genome program contractor-grantee workshop vi human genome meangement information systems, 1997 Making Databases Work Michael L. Brodie, 2018-12-14 This book celebrates Michael Stonebraker s accomplishments that led to his 2014 ACM A M Turing Award for fundamental contributions to the concepts and practices underlying modern database systems The book describes for the broad computing community the unique nature significance and impact of Mike s achievements in advancing modern database systems over more than forty years Today data is considered the world s most valuable resource whether it is in the tens of millions of databases used to manage the world s businesses and governments in the billions of databases in our smartphones and watches or residing elsewhere as yet unmanaged awaiting the elusive next generation of database systems Every one of the millions or billions of databases includes features that are celebrated by the 2014 Turing Award and are described in this book Why should I care about databases What is a database What is data management What is a database management system DBMS These are just some of the questions that this book answers in describing the development of data management through the achievements of Mike Stonebraker and his over 200 collaborators In reading the stories in this

book you will discover core data management concepts that were developed over the two greatest eras so far of data management technology The book is a collection of 36 stories written by Mike and 38 of his collaborators 23 world leading database researchers 11 world class systems engineers and 4 business partners If you are an aspiring researcher engineer or entrepreneur you might read these stories to find these turning points as practice to tilt at your own computer science windmills to spur yourself to your next step of innovation and achievement

Natural Language Interfaces to Databases Yunyao Li,Dragomir Radev,Davood Rafiei,2023-11-24 This book presents a comprehensive overview of Natural Language Interfaces to Databases NLIDBs an indispensable tool in the ever expanding realm of data driven exploration and decision making After first demonstrating the importance of the field using an interactive ChatGPT session the book explores the remarkable progress and general challenges faced with real world deployment of NLIDBs It goes on to provide readers with a holistic understanding of the intricate anatomy essential components and mechanisms underlying NLIDBs and how to build them Key concepts in representing querying and processing structured data as well as approaches for optimizing user queries are established for the reader before their application in NLIDBs is explored The book discusses text to data through early relevant work on semantic parsing and meaning representation before turning to cutting edge advancements in how NLIDBs are empowered to comprehend and interpret human languages Various evaluation methodologies metrics datasets and benchmarks that play a pivotal role in assessing the effectiveness of mapping natural language queries to formal queries in a database and the overall performance of a system are explored The book then covers data to text where formal representations of structured data are transformed into coherent and contextually relevant human readable narratives It closes with an exploration of the challenges and opportunities related to interactivity and its corresponding techniques for each dimension such as instances of conversational NLIDBs and multi modal NLIDBs where user input is beyond natural language This book provides a balanced mixture of theoretical insights practical knowledge and real world applications that will be an invaluable resource for researchers practitioners and students eager to explore the fundamental concepts of NLIDBs

Artificial Intelligence and Soft Computing Leszek Rutkowski,Rafał Scherer,Marcin Korytkowski,Witold Pedrycz,Ryszard Tadeusiewicz,Jacek M. Zurada,2023-09-13 The two volume set LNAI 14125 and 14126 constitutes the refereed conference proceedings of the 22nd International Conference on Artificial Intelligence and Soft Computing ICAISC 2023 held in Zakopane Poland during June 18 22 2023 The 84 revised full papers presented in these proceedings were carefully reviewed and selected from 175 submissions The papers are organized in the following topical sections Part I Neural Networks and Their Applications Evolutionary Algorithms and Their Applications and Artificial Intelligence in Modeling and Simulation Part II Computer Vision Image and Speech Analysis Various Problems of Artificial Intelligence Bioinformatics Biometrics and Medical Applications and Data Mining and Pattern Classification

Quasars at All Cosmic Epochs Paola Marziani, Mauro D'Onofrio, Ascensión del Olmo, Deborah Dultzin, 2018-10-05 The last 50 years have seen a tremendous progress in the research on quasars From a time when quasars were unforeseen oddities we have come to a view that considers quasars as active galactic nuclei with nuclear activity a coming of age experienced by most or all galaxies in their evolution We have passed from a few tens of known quasars of the early 1970s to the 500 000 listed in the catalogue of the Data Release 14 of the Sloan Digital Sky Survey Not surprisingly accretion processes on the central black holes in the nuclei of galaxies the key concept in our understanding of quasars and active nuclei in general have gained an outstanding status in present day astrophysics Accretion produces a rich spectrum of phenomena in all bands of the electromagnetic spectrum The power output of highly accreting quasars has impressive effects on their host galaxies All the improvement in telescope light gathering and in computing power notwithstanding we still miss a clear connection between observational properties and theory for quasars as provided for example by the H R diagram for stars We do not yet have a complete self consistent view of nuclear activity with predictive power as we do for main sequence stellar sources At the same time quasars offer many windows open onto the unknown On small scales quasar properties depend on phenomena very close to the black hole event horizon On large scales quasars may effect evolution of host galaxies and their circum galactic environments Quasars potential to map the matter density of the Universe and help reconstruct the Universe s spacetime geometry is still largely unexploited The times are ripe for a critical assessment of our present knowledge of quasars as accreting black holes and of their evolution across the cosmic time The foremost aim of this research topic is to

review and contextualize the main observational scenarios following an empirical approach to present and discuss the accretion scenario and then to analyze how a closer connection between theory and observation can be achieved identifying those aspects of our understanding that are still on a shaky terrain and are therefore uncertain knowledge This research topic covers topics ranging from the nearest environment of the black hole to the environment of the host galaxies of active nuclei and to the quasars as markers of the large scale structure and of the geometry of spacetime of the Universe The spatial domains encompass the accretion disk the emission and absorption regions circum nuclear starbursts the host galaxy and its interaction with other galaxies Systematic attention is devoted to some key problems that remain outstanding and are clearly not yet solved the existence of two quasar classes radio quiet and radio loud and in general the systematic contextualization of quasar properties the properties of the central black hole the dynamics of the accretion flow in the inner parsecs and the origin of the accretion matter the quasars small and large scale environment the feedback processes produced by the black hole into the host galaxy quasar evolutionary patterns from seed black holes to the present day Universe and the use of quasars as cosmological standard candles The timing is appropriate as we are now witnessing a growing body of results from major surveys in the optical UV X near and far IR and radio spectral domains Radio instrumentation has been upgraded to linear detector a change that resembles the introduction of CCDs for optical astronomy making it possible to study radio quiet quasars at radio frequencies Herschel and ALMA are especially suited to study the circum nuclear star formation processes The new generation of 3D magnetohydrodynamical models offers the prospective of a full physical modeling of the whole quasar emitting regions At the same time on the forefront of optical astronomy applications of adaptive optics to long slit spectroscopy is yielding unprecedented results on high redshift quasars Other measurement techniques like 2D and photometric reverberation mapping are also yielding an unprecedented amount of data thanks to dedicated experiments and instruments Thanks to the instrumental advances ever growing computing power as well as the coming of age of statistical and analysis techniques the smallest spatial scales are being probed at unprecedented resolution for wide samples of quasars On large scales feedback processes are going out of the realm of single object studies and are entering into the domain of issues involving efficiency and prevalence over a broad range of cosmic epochs The Research Topic Quasars at all Cosmic Epochs collects a large fraction of the contributions presented at a meeting held in Padova sponsored jointly by the National Institute for Astrophysics the Padova Astronomical Observatory the Department of Physics and Astronomy of the University of Padova and the Instituto de Astrofísica de Andalucía IAA of the Consejo Superior de Investigaciones Científicas CSIC The meeting has been part of the events meant to celebrate the 250th anniversary of the foundation of the Padova Observatory
