Introduction to Image Processing Using R Alejandro C. Frery, Talita Perciano, 2013-02-02 This book introduces the statistical software R to the image processing community in an intuitive and practical manner R brings interesting statistical and graphical tools which are important and necessary for image processing techniques Furthermore it has been proved in the literature that R is among the most reliable accurate and portable statistical software available Both the theory and practice of R code concepts and techniques are presented and explained and the reader is encouraged to try their own implementation to develop faster optimized programs Those who are new to the field of image processing and to R software will find this work a useful introduction By reading the book alongside an active R session the reader will experience an exciting journey of learning and programming

Play Among Books Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science

Image Processing Recipes in MATLAB® Oge Marques, Gustavo Benvenuto Borba, 2024-05-16 Leveraging the latest developments in MATLAB and its image processing toolbox this cookbook is a collection of 30 practical recipes for image processing ranging from foundational techniques to recently published algorithms Presented in a clear and meaningful sequence these recipes are prepared with the reader in mind allowing one to focus on particular topics or read as a whole from cover to cover Key Features A practical user friendly guide that equips researchers and practitioners with the tools to implement efficient image processing workflows in MATLAB Each recipe is presented through clear step by step instructions and rich visual examples Each recipe contains its own source code explanations and figures making the book an excellent standalone resource for quick reference Strategically structured to aid sequential learning yet with self contained chapters for those seeking solutions to specific image processing challenges The book serves as a concise and readable practical reference to deploy image processing pipelines in MATLAB quickly and efficiently With its accessible and practical approach the book is a valuable guide for those who navigate this evolving area including researchers students developers and practitioners in the fields of image processing computer vision and image analysis

Artificial Intelligence Programming with Python Perry Xiao, 2022-02-21 A hands on roadmap to using Python for artificial intelligence programming In Practical Artificial Intelligence Programming with Python From Zero to Hero veteran educator and photophysicist Dr Perry Xiao delivers a thorough introduction to one of the most exciting areas of computer science in modern history The book demystifies artificial intelligence and teaches readers its fundamentals from scratch in simple and

plain language and with illustrative code examples Divided into three parts the author explains artificial intelligence generally machine learning and deep learning It tackles a wide variety of useful topics from classification and regression in machine learning to generative adversarial networks He also includes Fulsome introductions to MATLAB Python AI machine learning and deep learning Expansive discussions on supervised and unsupervised machine learning as well as semi supervised learning Practical AI and Python cheat sheet quick references This hands on AI programming guide is perfect for anyone with a basic knowledge of programming including familiarity with variables arrays loops if else statements and file input and output who seeks to understand foundational concepts in AI and AI development

Design of Intelligent Applications using Machine Learning and Deep Learning Techniques Ramchandra Sharad Mangrulkar, Antonis Michalakis, Narendra Shekoker, Meera Narvekar, Pallavi Vijay Chavan, 2021-08-15 Machine learning ML and deep learning DL algorithms are invaluable resources for Industry 4.0 and allied areas and are considered as the future of computing A subfield called neural networks to recognize and understand patterns in data helps a machine carry out tasks in a manner similar to humans The intelligent models developed using ML and DL are effectively designed and are fully investigated bringing in practical applications in many fields such as health care agriculture and security These algorithms can only be successfully applied in the context of data computing and analysis Today ML and DL have created conditions for potential developments in detection and prediction Apart from these domains ML and DL are found useful in analysing the social behaviour of humans With the advancements in the amount and type of data available for use it became necessary to build a means to process the data and that is where deep neural networks prove their importance These networks are capable of handling a large amount of data in such fields as finance and images This book also exploits key applications in Industry 4.0 including Fundamental models issues and challenges in ML and DL Comprehensive analyses and probabilistic approaches for ML and DL Various applications in healthcare predictions such as mental health cancer thyroid disease lifestyle disease and cardiac arrhythmia Industry 4.0 applications such as facial recognition feather classification water stress prediction deforestation control tourism and social networking Security aspects of Industry 4.0 applications suggest remedial actions against possible attacks and prediction of associated risks Information is presented in an accessible way for students researchers and scientists business innovators and entrepreneurs sustainable assessment and management professionals This book equips readers with a knowledge of data analytics ML and DL techniques for applications defined under the umbrella of Industry 4.0 This book offers comprehensive coverage promising ideas and outstanding research contributions supporting further development of ML and DL approaches by applying intelligence in various applications
