Siteless 1001 Building Forms :

SITELESS Francois Blanciak,2008-02-29 An attempt to free architecture from site and program constraints and to counter the profusion of ever bigger architecture books with ever smaller content Some may call it the first manifesto of the twenty first century for it lays down a new way to think about architecture Others may think of it as the last architectural treatise for it provides a discursive container for ideas that would otherwise be lost Whatever genre it belongs to *SITELESS* is a new kind of architecture book that seems to have come out of nowhere Its author a young French architect practicing in Tokyo admits he didn t do this out of reverence toward architecture but rather out of a profound boredom with the discipline as a sort of compulsive reaction What would happen if architects liberated their minds from the constraints of site program and budget he asks The result is a book that is saturated with forms and as free of words as any architecture book the MIT Press has ever published The 1001 building forms in *SITELESS* include structural parasites chain link towers ball bearing floors corrugated corners exponential balconies radial facades crawling frames forensic housing and other architectural ideas that may require construction techniques not yet developed and a relation to gravity not yet achieved *SITELESS* presents an open ended compendium of visual ideas for the architectural imagination to draw from The forms drawn freehand to avoid software specific shapes but from a constant viewing angle are presented twelve to a page with no scale order or end to the series After setting down 1001 forms in siteless conditions and embryonic stages Blanciak takes one of the forms and performs a scale test showing what happens when one of these fantastic ideas is subjected to the actual constraints of a site in central Tokyo The book ends by illustrating the potential of these shapes to morph into actual building proportions

Intelligence, Creativity and Fantasy Mário Ming Kong, Maria do Rosário Monteiro, Maria João Pereira Neto,2019-09-30 The texts presented in *Proportion Harmonies and Identities PHI INTELLIGENCE CREATIVITY AND FANTASY* were compiled with the intent to establish a multidisciplinary platform for the presentation interaction and dissemination of research The aim is also to foster the awareness and discussion on the topics of Harmony and Proportion with a focus on different visions relevant to Architecture Arts and Humanities Design Engineering Social and Natural Sciences and their importance and benefits for the sense of both individual and community identity The idea of modernity has been a significant motor for development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts

Universal Principles of Architecture WAI Architecture Think Tank, Cruz Garcia, Nathalie Frankowski,2023-10-31 *Universal Principles of Architecture* is a concise visual introduction to 100 of the most fundamental elements of architecture

A Language of Contemporary Architecture Rafael Luna, Dongwoo Yim,2023-05-05 As a way to understand the contemporary project in architecture this book provides an index of ideas theories projects and definitions that string into a methodology for evaluating the contemporary language of architecture

described as contemporism through a review of topology form and typology system and elements The contemporary project has been trying to answer the postmodern question of how to move beyond modernism through a thread of architectural styles that tried to respond to deficiencies from the modern promise and contextual changes Yet the question remains should this ongoing struggle to move beyond modernism be a stylistic battle Has the present architectural practice ever left the modernist tendencies and is there a structure for a contemporary language in architecture This book presents a collection of highly illustrated projects that have worked under these parameters to break away from modernism in order to present a holistic integration of topology and typology as a language for contemporism The index is illustrated with individual spreads which can be read sequentially or independently and encourages the reader to make their own connections It also includes interviews and contributions from Toyo Ito Anthony Vidler Ben van Berkel Christian Kerez and Greg Lynn This book is essential reading for undergraduate and graduate students in architecture

Re-Imagining the Avant-Garde Matthew Butcher, Luke C. Pearson, 2019-07-10 The 1960s and 1970s avant garde has been likened to an architectural Big Bang such was the intensity of energy and ambition in which it exploded into the postwar world Marked out by architectural projects that redefined the discipline it remains just as influential today References to the likes of Archizoom Peter Eisenman John Hejduk and Superstudio abound Highly diverse the avant garde cannot be defined as a single strand or tendency It was divergent geographically reaching from Europe to North America and Japan and in its political formal and cultural preoccupations It was unified though as a critical and experimental force critiquing contemporary society against the backdrop of extreme social and political upheaval the Paris riots of May 1968 the anti Vietnam war movement in America and the looming ecological crisis Re imagining the Avant garde outlines how in contemporary architectural practice avant garde projects retain their power as historical precedents as barometers of a particular design ethos as critiques of society and instigators of new formal techniques Given the far reaching impact of the subsequent digital revolution which has since reshaped every aspect of practice the issue asks why this historical period continues to retain its undeniable grip on current architecture Contributors Pablo Bronstein and Sam Jacob Sarah Deyong Stylianos Giamarellos Damjan Jovanovic Andrew Kovacs Perry Kulper Igor Marjanovic William Menking Michael Sorkin Neil Spiller and Mimi Zeiger Featured architects Archizoom Andrea Branzi Jimenez Lai Luis Miguel Koldo Lus Arana Klaus NEMESTUDIO Superstudio and UrbanLab

Design Issues ,2008 **The Publishers Weekly** ,2008 **RIBA Journal** ,2008 *Abitare* ,2009 [Tokyoids](#) Francois Blanciak, 2022-09-13 A photographic survey of the robotic face of Tokyo buildings and an argument that robot aesthetics plays a central role in architectural history In Tokyoids

architect Fran ois Blanciak surveys the robotic faces omnipresent in Tokyo buildings offering an architectural taxonomy based not on the usual variables size material historical style but on the observable expressions of buildings Are the eyes windows twinkling the mouth door laughing Is that balcony a howl of distress Investigating robot aesthetics through his photographs of fifty buildings Blanciak argues that the robot face originated in architecture before the birth of robotics and has played a central role in architectural history Blanciak first puts the robot face into historical perspective examining the importance of the face in architectural theory and demonstrating that the construction of architecture s emblematic portraits triggered the emergence of a robot aesthetics He then explores the emotions conveyed by the photographed buildings robot faces in chapters titled Awe Wrath Mirth Pain Angst and Hunger As he does so he considers among other things the architectural relevance of Tokyo s ordinary buildings the repression of the figural in contemporary architecture an aesthetic of dismemberment linked to the structure of the Japanese language and local building design and the influence of automation technology upon human interaction Part photographic survey part theoretical inquiry Tokyoids upends the usual approach to robotics in architecture by considering not the automation of architectural output but the aesthetic properties of the robot
