Six Degrees Mark Lynas:

Six Degrees Mark Lynas, 2008 In astonishing and unflinching detail a noted science journalist explains how Earth's climate will be impacted with every degree of increase in global warming and what can be done about it now *Six Degrees: the 2020 Report* Mark Lynas, 2020-04-16 Mark Lynas delivers an alarming account of the future of our earth and our civilisation if current rates of global warming persist We are living in a climate emergency But how much worse could it get *A Sacramental-Prophetic Vision* Matthew T. Eggemeier, 2014-04-23 The sacramental and prophetic traditions of Christian spirituality suggests Matthew Eggemeier possess critical resources for responding to the contemporary social crises of widespread ecological degradation and the innocent suffering of the crucified poor In *A Sacramental Prophetic Vision* Eggemeier maintains that the vital key for cultivating these traditions in the present is to situate these spiritualities in the context of spiritual exercises or ascetical practices that enable Christians to live more deeply in the presence of God coram Deo and in turn to make this presence visible in a suffering world *How to Think Seriously about the Planet* Roger Scruton, 2014-10 Roger Scruton here makes a plea to rescue environmental politics from the activist movements and to return them to the people The book defends the legacy of home building and practical reasoning with which ordinary human beings solve their environmental problems and attacks the alarmism and hysteria that are being used to uproot these resources while putting nothing coherent in their place *The Environmental Documentary* John A. Duvall, 2017-05-18 *The Environmental Documentary* provides the first extensive coverage of the most important environmental films of the decade including their approach to their topics and their impacts on public opinion and political debate While documentaries with themes of environmental activism date back at least to Pare Lorenz's films of the 1930s no previous decade has produced the number and quality of films that engage environmental issues from an activist viewpoint The convergence of high profile issues like climate change fossil fuel depletion animal abuse and corporate malfeasance has combined with the miniaturization of high quality recording equipment and the expansion of documentary programming to produce an unprecedented number of important and influential documentary productions The text examines the processes of production and distribution that have produced this explosion in documentaries The films range from a high profile Hollywood production with theatrical distribution like *An Inconvenient Truth* to shorter independently produced films like *The End of Suburbia* that have reached a small audience of activists through video distribution interviews with many of the filmmakers and word of mouth **Teaching Climate Change to Adolescents** Richard Beach, Jeff Share, Allen Webb, 2017-05-25 THE essential resource for middle and high school English language arts teachers to help their students understand and address the urgent issues and challenges facing life on Earth today this text features classroom activities written and used by teachers and a website <http://climatechangeela.pbworks.com> with additional information and links All royalties from the sale of this book are donated to Alliance for Climate Education <https://acespace.org> **Climate Change in Popular Culture**
