- If steam pressure is kept constant and more energy is added, its temperature increases and saturated steam becomes superheated steam (SHSD).
- If extra heat can be transferred to an available heat sink, SHSD returns to saturated conditions.
- Any convection dryer can be made into SHSD e.g. fluidized bed, flash, rotary, conveyor type, spray, impinging jet; opposing jets (impinging streams) etc. Additional heat sources e.g. radiation, conduction, MW etc can also be added.
- Low, near-atmospheric or high pressure operation possible.
