NUMBER & CHARACTER

Integer
The integer data type represents whole numbers. It is the most basic of the numeric types. The range of values is from -2,147,483,648 to 2,147,483,647. The integer type is used for counting and indexing.

Float
The float data type represents real numbers. It is used for calculations involving decimal values. The range of values is from approximately 1.18e-38 to 3.4e+38. The float type is used for scientific and engineering calculations.

Double
The double data type represents real numbers with higher precision than float. It is used for calculations requiring more accuracy. The range of values is from approximately 2.23e-308 to 1.8e+308. The double type is used for high-precision scientific and engineering calculations.

Character
The character data type represents a single character. It is used for storing and manipulating individual characters. The range of values is from 0 to 255. The character type is used for string processing and character-based operations.

String
The string data type represents a sequence of characters. It is used for storing and manipulating text. The range of values is from 0 to 255 characters. The string type is used for text processing and string-based operations.

Boolean
The boolean data type represents logical values. It is used for storing and manipulating true and false values. The range of values is from 0 to 1. The boolean type is used for conditional logic and boolean operations.

Complex
The complex data type represents complex numbers. It is used for calculations involving imaginary numbers. The range of values is from 0 to 255. The complex type is used for advanced mathematical and scientific calculations.

Operator
The operator data type represents mathematical and logical operators. It is used for performing operations on data. The range of values is from 0 to 255. The operator type is used for arithmetic and logical operations.

Function
The function data type represents a block of code that performs a specific task. It is used for organizing and reusing code. The range of values is from 0 to 255. The function type is used for modular programming and code reuse.

Class
The class data type represents a blueprint for creating objects. It is used for organizing and encapsulating data and code. The range of values is from 0 to 255. The class type is used for object-oriented programming and data encapsulation.

Struct
The struct data type represents a collection of related data items. It is used for organizing and grouping data. The range of values is from 0 to 255. The struct type is used for data organization and grouping.

Union
The union data type represents a data structure that can store one of several different types of data. It is used for memory optimization and data flexibility. The range of values is from 0 to 255. The union type is used for memory-efficient data storage.

Enum
The enum data type represents a set of named constants. It is used for defining and restricting the values of a variable. The range of values is from 0 to 255. The enum type is used for defining discrete values and constants.

Pointer
The pointer data type represents the memory address of another variable. It is used for indirect data access and manipulation. The range of values is from 0 to 255. The pointer type is used for dynamic memory management and data manipulation.

C++ Standard Library Scott Smith,2019-11 An extremely handy

programmer's standard library reference that is as durable as it is portable. This 6 page laminated guide includes a collection of function and class declarations defined as part of the C Standard. The declarations are contained in header files that can be categorized according to the functionality they provide. These essential declarations are used by developers of all skill levels to simplify the process of programming in C. This guide is all script and is organized to find needed script quickly without using screen space or extra clicks; it's already here at your fingertips. As with QuickStudy reference on any subject with continued reference, the format lends itself to memorization. Beginning students or seasoned programmers will find this tool a perfect go-to for the at-a-glance script answer and memory jog you might need. At this price and for the bank of script included, it's an easy add to your programmer's toolbox.
