**ECMLG 2016 - Proceedings of the 12th European Conference on Management, Leadership and Governance ,**

Proceedings of the 12th European Conference on Management Leadership and Governance *An Anthropological Approach to mHealth* Charlotte Hawkins,Patrick Awondo,Daniel Miller,2024-10-28 This book proposes a radically different anthropological approach to the development and dissemination of mobile health mHealth a rapidly growing sector in healthcare An Anthropological Approach to mHealth is based on ten 16 month ethnographies in settings across Asia Africa Europe and Latin America that showed how conventional health apps may be irrelevant particularly for older people Instead the studies found that many people use their mobile and smartphones for health purposes to a surprising extent They take the communicative apps they have become comfortable with such as LINE WeChat and WhatsApp and are highly creative in turning them into their own health apps These are the practices from which this book seeks to learn in what we call a smart from below approach This body of research also provided many additional insights including the consequences of googling for health information the role of the smartphone in specific settings such as an oncology clinic in Chile or tele psychotherapy in Uganda and the lessons learnt during Covid 19 around the problems in self tracking Overall the authors show how an anthropological approach situated in the observation of everyday life can be the foundation for an alternative but highly promising perspective on the future of mHealth

**The Global Smartphone** Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose so you would think we would know what it is But do we To find out 11 anthropologists each spent 16 months living in communities in Africa Asia Europe and South America focusing on the take up of smartphones by older people Their research reveals that smartphones are technology for everyone not just for the young The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project Smartphones have become as much a place within which we live as a device we use to provide perpetual opportunism as they are always with us The authors show how the smartphone is more than an app device and explore differences between what people say about smartphones and how they use them The smartphone is unprecedented in the degree to which we can transform it As a result it quickly assimilates personal values In order to comprehend it we must take into consideration a range of national and cultural nuances such as visual communication in China and Japan mobile money in Cameroon and Uganda and access to health information in Chile and Ireland all alongside diverse trajectories of ageing in Al Quds Brazil and Italy Only then can we know what a smartphone is and understand its consequences for people s lives around the world

*Rethinking Virtual Places* Erik M. Champion,2021-11-30 How would the humanities change if we grappled with the ways in which digital and virtual places are designed experienced and critiqued In *Rethinking Virtual Places* Erik Malcolm Champion draws from the fields of computational sciences and other place related disciplines to argue for a more central role for virtual space in the humanities

For instance recent developments in neuroscience could improve our understanding of how people experience store and recollect place related encounters Similarly game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient In addition Champion provides a brief introduction to new and emerging software and devices and explains how they help hinder or replace our traditional means of designing and exploring places Perfect for humanities scholars fascinated by the potential of virtual space Rethinking Virtual Places challenges both traditional and recent evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place
