Simple packet filters are becoming a thing of the past Even the open source domain is moving towards Next Generation

Firewalls OPNsense is a top player when it comes to intrusion detection application control web filtering and Antivirus No

network is too insignificant to be spared by an attacker Even home networks washing machines and smartwatches are under

threat and require a secure environment Firewalls are a component of the security concept They protect against known and

emerging threats to computers and networks A firewall offers the highest level of protection if its functions are known its

operation is simple and it is ideally positioned in the surrounding infrastructure OPNsense accepts the challenge and meets

these criteria in a number of ways This book is the ideal companion for understanding installing and setting up an OPNsense

firewall Each chapter explains a real world situation describes the theoretical fundamentals and presents a lab experiment

for better understanding Finally it offers a solution using OPNsense methods and knowledge with a technical standpoint The

chapters are mostly independent of each other however they do increase in competency level The topics covered are

appropriate for beginners and professionals Major topics include Installation of OPNsense on physical hardware VMware or

VirtualBox Initial setup Updates and configuration IPv6 Transparent firewall Address translation NAT Management interface

IPsec and OpenVPN Web Proxy Authentication Multi WAN Intrusion Detection High Availability API Performance Tuning
