ISE C++ PROGRAMING Malik,2012 Problem Solving, Abstraction, Design Using C++ Frank L. Friedman, Elliot B. Koffman, 2000 This revision of the classic Problem Solving Abstraction and Design Using C presents and then reinforces the basic principles of software engineering and object oriented programming while introducing the C programming language One of the hallmarks of this book is the focus on program design Professors Frank Friedman and Elliot Koffman present a Software Development Method in Chapter 1 that is revisited in the Case Studies throughout the book This book carefully presents object oriented programming by balancing it with procedural programming so the reader does not overlook the fundamentals of algorithm organization and design Object oriented concepts are presented via an overview in Chapter 1 and then demonstrated with the use of the standard string and iostream classes and a user defined money class throughout the early chapters Chapter 10 shows how to write your own classes and chapter 11 shows how to write template classes The presentation of classes is flexible and writing classes can be covered earlier if desired

Problem Solving, Abstraction, and Design Using C++ Frank L. Friedman, Elliot B. Koffman, 1997 While emphasizing problem solving and programming skills the authors introduce object oriented concepts early in the text The system defined string and stream classes and a user defined money class are used to reinforce the importance of data modeling in programming This second edition contains all of the classic learning features readers have come to know and trust in authors Frank Friedman and Elliot Koffman These features include case studies program style sections syntax display boxes end of section exercises common error sections chapter reviews quick check exercises and programming projects Highlights Presents only the essential features of C providing the beginning Computer Science student with a gentle introduction to the language Addresses recent changes to the C language including the new C variable length string in Chapter 3 and the new type bool for writing logical expressions starting with Chapter 4 Introduces the concepts of objects classes and class libraries in Chapter 2 The concept of objects is carried throughout the remaining chapters with a money class Provides flexible coverage of writing classes professors who prefer to have thei
