Enhancing enterprise competitiveness Prashant Gupta,Rajesh Kumar Jain,Upinder Dhar,2007 Papers presented at the Nirma International Conference on Management held at Ahmedabad during 5 7January 2007 Innovation and Future of Enterprise Information Systems Felix Piazzolo,Michael Felderer,2013-05-15 This volume presents the revised and peer reviewed contributions of the ERP Future 2012 conference held in Salzburg Austria on November 11th 12th 2012 The conference is a platform for research in ERP systems and closely related topics like business processes business intelligence and enterprise information systems in general To master the challenges of ERP comprehensively the ERP Future 2012 Research conference accepted contributions both with a business focus as well as with an IT focus to consider enterprise resource planning from various viewpoints This combination of business and IT aspects is a unique characteristic of the conference and of this volume that resulted in valuable contributions with high practical impact Proceedings of the XIII International Symposium SymOrg 2012: Innovative Management and Business Performance ,2012-06-03 **Why ERP? A Primer on SAP Implementation** F. Robert Jacobs,D. Clay Whybark,2000-01-06 Why ERP is not a traditional textbook designed for a specified course it is patterned after the wildly successful short novel The Goal by Eli Goldratt The Goal is currently required reading in many undergraduate MBA and executive courses Like The Goal Why ERP is a short novel about a manager in a furniture manufacturing business who is charged with learning about and implementing a new ERP system particularly SAP R 3 The story tells of his experience learning about it his considering other installations as examples and then his deciding the key issues and how to proceed Incorporated into the story is a concise introduction to the basic concepts and architecture of ERP systems including actual screen shots of R 3 modules Though this is NOT a programming book it is a quick read overview and it can be assigned even for systems majors as a background reading to lay out the managerial issues and build a basic understanding of the concepts prior to doing actual technical programming or hands on R 3 projects Through the eyes of the hero in the novel the reader is presented with all the related implementation and business issues Intended to provide a non technical non programming introduction this book can stand alone as a quick read or self study introduction for any manager or business student The text is also great for schools who do NOT have any SAP Oracle PeopleSoft or other ERP system on campus and who have no access to online or hands on samples or examples This book can provide the needed literacy and awareness of what ERP is and why it matters *Enterprise Information Systems for Business Integration in SMEs: Technological, Organizational, and Social Dimensions* Cruz-Cunha, Maria Manuela,2009-09-30 Discusses the main issues challenges opportunities and trends related to the impact of IT on every part of organizational and inter organizational environments *Enterprise Information Systems VI* Isabel Seruca,José Cordeiro,Slimane Hammoudi,Joaquim Filipe,2006-07-08 This book contains the best papers of the Sixth International Conference on Enterprise Information Systems ICEIS 2004 held in Porto Portugal and organized by INSTICC Institute for

Systems and Technologies of Information Communication and Control in collaboration with PORTUCALENSE UNIVERSITY who hosted the event Following the route started in 1999 ICEIS has become a major point of contact between research scientists engineers and practitioners on the area of business applications of information systems This conference has received an increased interest every year from especially from the international academic community and it is now one of the world largest conferences in its area This year five simultaneous tracks were held covering different aspects related to enterprise computing including Databases and Information Systems Integration Artificial Intelligence and Decision Support Systems Information Systems Analysis and Specification Software Agents and Internet Computing and Human Computer Interaction The sections of this book reflect the conference tracks

The Making of Information Systems Karl E. Kurbel, 2008-04-24 Information systems IS are the backbone of any organization today supporting all major business processes This book deals with the question how do these systems come into existence It gives a comprehensive coverage of managerial methodological and technological aspects including Management decisions before and during IS development acquisition and implementation Project management Requirements engineering and design using UML Implementation testing and customization Software architecture and platforms Tool support CASE tools IDEs collaboration tools The book takes into account that for most organizations today inhouse development is only one of several options to obtain an IS A good deal of IS development has moved to software vendors be it domestic offshore or multinational software firms Since an increasing share of this work is done in Asia Eastern Europe Latin America and Africa the making of information systems is discussed within a global context
