Results are the mean of three determinations

Out of Six formulations F3 showed maximum drug release i.e. 96.61 %. Solid dispersion (F3) of Carvedilol with PEG 6000 prepared by Kneading method showed significant improvement in solubility and dissolution rate. Increased wetting and solubilizing effect of PEG 6000 as well as the molecular dispersion of drug in solid dispersion and alteration of surface properties of drug particle may be responsible for the enhanced dissolution rate of Carvedilol from solid dispersion compared to pure Carvedilol.
