moderate Muslims in Southeast Asia are reinterpreting Islam not to reject modernity but to create a spiritual economy consisting of practices conducive to globalization Drawing on more than two years of research in Indonesia most of which took place at state owned Krakatau Steel Rudnyckj shows how self styled spiritual reformers seek to enhance the Islamic piety of workers across Southeast Asia and beyond Deploying vivid description and a keen ethnographic sensibility Rudnyckj depicts a program called Emotional and Spiritual Quotient ESQ training that reconfigures Islamic practice and history to make the religion compatible with principles for corporate success found in Euro American management texts self help manuals and life coaching sessions The prophet Muhammad is represented as a model for a corporate CEO and the five pillars of Islam as directives for self discipline personal responsibility and achieving win win solutions Spiritual Economies reveals how capitalism and religion are converging in Indonesia and other parts of the developing and developed world Rudnyckj offers an alternative to the commonly held view that religious practice serves as a refuge from or means of resistance against modernization and neoliberalism Moreover his innovative approach charts new avenues for future research on globalization religion and the predicaments of modern life
