**The Early Years, 4-Stroke Engines Make Their Debut** Jay Meldrum, 2016-12-22 This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using E10 gasoline (10% ethanol mixed with pump gasoline). Performance technologies that are presented include: Engine Design application of the four stroke engine; Applications to address both engine and track noise; Exhaust After treatment to reduce emissions. The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel as well as the zero

emissions category in which range and draw bar performance are measured The goal of the competition is designing a cleaner and quieter snowmobile The competitors modified snowmobiles are also expected to be cost effective and comfortable for the operator to drive Internal Combustion Engine, Design and Practice Edward Butler,1920
