Temporal Databases Dr. Kamran Ahsan & Prativadi Vijay,2014-06-17 Need for database reasonably increased as the data manipulation changes and leverage for storage has become essential Temporal database has been one of the special

kinds in the field of database According to the concept of time stamping various models has emerged and temporal models namely McKenzie BenZvi s and non temporal models namely Colby Deshpande and Larson s model has grabbed unique attention towards in this area of temporal database Reliable and Enhanced stratum middleware management capabilities enable the temporal queries for ease in transactions Richness in point based and maximum timestamp approaches provide high indexing mechanisms which make efficient storage of data in tree structure format The proposed prototype model uses Temporal Relational Algebra and TSQL2 declarative language which display the past present and future related data The inclusion of T4SQL instead of TSQL2 Temporal Multi Secure Database and spatio temporal database model can make this model stronger than present and make it work more efficiently   Rapid Java Application Development Using JBuilder 3 Y. Daniel Liang,2000 Comprehensive and incremental this text focuses on rapid Java application development The early chapters introduces JavaBeans the basis of rapid Java application development while subsequent chapters apply step by step rapid application development techniques to build comprehensive robust and useful graphics applications database and client server applications and distributed applications   Rapid Java Application Development Using Sun ONE Studio 4 Y.
