The first edition of the National Marine Fisheries Service (NMFS) U.S. National Bycatch Report (NBR First Edition), published in 2011, documented bycatch estimates using observer data and self-reported log-book data for all fisheries for which this information was available in 2005. The Update also highlighted differences in bycatch levels for specific species and fisheries between 2005 and 2010. For example, estimated Alaska Region longline fishery seabird bycatch was 3,712 birds for 2010, compared to 6,353 birds for 2005. In addition, the bycatch ratio for the
