evaluation process itself Can aid evaluation be improved in order to increase the effectiveness of aid **Evaluating Transnational Programs in Government and Business** Vincent E. McHale, Barry B. Hughes, Kenneth W. Grundy, 2013-10-22

**Evaluating Transnational Programs in Government and Business** is a collection of papers presented at a symposium entitled *Evaluating Transnational Programs* conducted at Case Western Reserve University during the 1977-1978 academic year. The symposium was organized to address the various issues and controversies surrounding adequate methods for effective policy evaluation and assessment at the transnational level. The book explores the conceptual, methodological, bureaucratic, political, and organizational factors that hinder sound evaluation of government and private programs with transnational implications. This monograph consists of 11 chapters and opens with an introduction to methodological issues in the transnational field. It then reviews the development of various world modeling activities and compares them from the standpoints of characteristics, structure, methodological underpinnings, applications, and criticisms. The World Integrated Model is used to assess United States policy options regarding agricultural exports and oil imports by placing them in a broader transnational context. The following chapters focus on various problems in the evaluation of U.S. foreign economic policies, including foreign trade and investment policies. The criteria used by development banks in the processing of loan requests are also considered, along with non-economic objectives in economic development assistance programs, the role of multinational corporations as agents of technology transfer, and their effects on changing U.S. policies regarding foreign investment. The final chapter deals with the growing need for transnational appraisal of the impacts of institutions on basic human values. This book will be of interest to business and government officials as well as social and political scientists.

**Project Evaluation** Heng-Kang Sang, 1995 **The Social Value of Investment and the Shadow Wage Rate** Partha Dasgupta, 1973 **Project Analysis in Developing Countries** S. Curry, J. Weiss, 1994-01-07 Investment projects are an important mechanism for economic development. However, their costs and benefits must be assessed to ensure that the resources committed are being used as productively as possible. This book explains the techniques available to assess the economic impact of projects in developing countries. It draws on the authors' experience in teaching and applying these techniques and combines relevant economic theory with a clear understanding of what can be done in practice. The book aims to make existing techniques readily accessible to both students and practitioners. *Project Evaluation* Axel Sell, 1991 This book aims to be an introduction and support to the carrying out of financial and economic analysis of a country's projects. It uses a case study of a joint venture between domestic and foreign investors in a developing country to show how the theoretical analysis relates to real life. The financial and economic analyses are systematically linked. All aspects which are considered significant are treated in separate steps, thereby simplifying the evaluation process for the reader.
