You are not turning this in, so you don't really need to write anything down.

These are the types of questions you will be asked. Work with a partner if you want. Consider this your test study guide.

Note: There are some trick questions below. I don't normally do trick questions on a test, but they illustrate common errors programmers make.

-
1. There are two ways to do comments. Let's say you wanted to put your name, date, and project name at the top of your project. Write out both ways to do that using comments.
-

```

```

```

4. What will print out to the screen with the following code?

```

Java Exercises And Solutions For Beginners:

Beginning JavaServer Pages Vivek Chopra, Jon Eaves, Rupert Jones, Sing Li, John T. Bell, 2005-02-08 JSP is one of the core technologies for server side Java applications and the 2.0 release which this book covers in detail makes JSP an even more powerful tool. Walks Java programmers and Web developers through JSP fundamentals including JSP syntax and directives, JSP Expression Language, JSP Tag libraries, JSTL and techniques for testing and debugging. Shows how to use JSP in real world Web applications along with open source frameworks such as Struts, WebWork and Turbine software design methodologies and developer tools like Ant, junit and CVS as well as popular IDEs, integrated development environments. Each chapter has an exercise section with solutions on the companion Web site. [Beginning J2EE 1.4](#) James Weaver, Kevin Mukhar, Jim Crume, 2004-02-10 This book is more than simply a reprint of material already freely available on the Web. It is looking at you. The J2EE Tutorial Concentrates on the parts of J2EE that readers find most interesting, accessible and relevant for the start of their professional career. JSP and Servlets rather than in depth coverage of EJB helps reader accomplish something and may spark interest for further exploration of J2EE. This title will concentrate on web development using JSP and Servlets but still be aimed at programmers who want to become J2EE developers so it will be a title for the Java category not JavaServer Pages.
