V. Preetham,2002-09-05 A must have for any serious Java developer this title enables readers to build web services for next generation applications with Sun s new Web Services pack for Java 2 Web services are the future of web application development Web services are a crucial element in emerging platforms from Sun Microsoft IBM HP and others Covers building web services with Sun s Web Services pack Leading

software development tool vendors including Borland Software Corp Oracle Corp and WebGain Inc as well as Sun's Forte™ tools group plan to integrate the Web Services Pack into their Java IDEs Written by Java developers at leading technology training company NIIT USA J2EE Platform Web Services Ray Lai, 2003 Build robust scalable end-to-end business solutions with J2EE Web Services This is the definitive practitioner's guide to building enterprise class J2EE Web Services that integrate with any B2B application and interoperate with any legacy system Sun senior architect Ray Lai introduces 25 vendor-independent architectural patterns and best practices for designing Web Services that deliver outstanding performance scalability and reliability Lai takes you to the frontiers of emerging Web Services technologies showing how to make the most of today's leading edge tools from Java Web Services Developer Pack to Apache Axis Coverage includes Web Services making the business case and overcoming the technical and business challenges Real life examples and scenarios and a start-to-finish application case study Expert guidance on reducing risk and avoiding implementation pitfalls Building complete business solutions with rich messaging and workflow collaboration Mainframe interoperability and B2B integration within and beyond the enterprise Framework and methodology to develop your Web Services patterns and best practices Up-to-the-minute coverage of Web Services security New applications service consolidation wireless and more An extensive library of links to Web resources reference material and vendors Whether you're an architect designer project leader or developer these are the best practices patterns and techniques you need to succeed with Web services in your enterprise environment Enterprises seeking to leverage Web Services to revolutionize the ways they deliver services to customers partners and employees will find the answers they need in this book Ray Lai's J2EE™ Platform Web Services is a comprehensive look at J2EE platform architecture and should be a must-read for any serious Web Services developer Larry Tabb Senior Strategic Advisor Tower Group This is a book for true practitioners It's for those interested in designing and implementing Web Services now and preparing for new opportunities on the horizon Jonathan Schwartz Executive Vice President Sun Microsystems **Java Web Services** David A. Chappell, 2002 For many Java developers web services appeared to come out of nowhere Its advantages are clear web services are platform independent like Java itself language agnostic a clear advantage over Java RMI can easily be tunneled through firewalls an obvious benefit to anyone who has dealt with modern enterprise networks object-oriented we all know about that and tends to be loosely coupled allowing more flexible application development But these advantages have been obscured by a cloud of hype and a proliferation of jargon that are difficult to penetrate What are SOAP UDDI WSDL and JAXM To say nothing of JAXR tModels category bags WSFL and other friends And assuming that you understand what they are how do you do anything with them Do they live up to their promises Are they really the future of network computing or a dead end Java Web Services gives the experienced Java developer a way into the Web Services world It helps you to understand what's going on what the technologies mean and how they relate and shows Java developers how to put them to use to solve real problems You'll learn what's real and what

isn't what the technologies are really supposed to do and how they do it Java Web Services shows you how to use SOAP to perform remote method calls and message passing how to use WSDL to describe the interface to a web service or understand the interface of someone else's service and how to use UDDI to advertise publish and look up services in each local or global registry Java Web Services also discusses security issues interoperability issues integration with other Java enterprise technologies like EJB the work being done on the JAXM and JAX-RPC packages and integration with Microsoft's .NET services The web services picture is still taking shape there are many platforms and APIs to consider and many conflicting claims from different marketing groups And although web services are inherently language independent the fit between the fundamental principles on which Java and web services are based means that Java will almost certainly be the predominant language for web services development If you're a Java developer and want to climb on the web services bandwagon or if you only want to kick the tires and find out what web services has to offer you will find this book indispensable

[Java API for RESTful Web Services](#) Zanis Khan, 2020 Master the Java API for RESTful Web Services in this in-depth course from Java expert Zanis Khan There are seven topics which focus on the Java programming language API spec allowing you to create powerful web services according to the Representational State Transfer architectural pattern

Introducing RESTful Services Be able to explain RESTful Representational State Transfer services during this first topic in the Rest API using Java course Follow along with Zanis and learn about the tools we will use Oracle Weblogic and Eclipse Oracle database and the Chrome browser to start building APIs HTTP XML JSON and URIs are discussed as well Using the RESTful API Service Practice working with the RESTful API Service during this second topic in the Rest API using Java course Get the environment up and running and also set up two very important frameworks the Jersey framework and the Jackson framework Connecting to a Database Use the RESTful API service to connect to a database during this third topic in the Rest API using Java course Creating Search Functionality Part 1 Use the RESTful API service to create search functionality during this fourth topic in the Rest API using Java course Creating Search Functionality Part 2 Continue using the RESTful API service and build upon the prior session to include additional search functionality during this fifth topic in the Rest API using Java course Submitting Data Use the RESTful API service to submit data during this sixth topic in the Rest API using Java course Follow along with Zanis and practice using SQL to insert data into the relational database Updating and Deleting Data Use the RESTful API service to update and delete data during this seventh topic in the Rest API using Java course Follow along with Zanis and practice using SQL to update and delete data from the relational database
