PYTHON PROGRAMMING FOR NEWBIES Ajit Kumar,2021-05-06 Python is one of the best programming languages which is both simple and powerful This is good for beginners as well as for experts and more importantly is fun to program with This book aims to help you learn this wonderful language and show how to get things done quickly This book is written to help you learn Python programming FAST and learn it WELL If you are a beginner in Programming you ll find that this book explains complex concepts in an easy to understand manner Examples are carefully chosen to demonstrate each concept so that you can gain a deeper understanding of the language Also as Richard Branson puts it The best way of learning about anything is by doing At the end of the course you ll be guided through a project that gives you a chance to put what you ve learned to use If you think you are new to programming it s the right place which helps you to learn the alphabets of Python If you are an experienced coder this book gives you a good base to explore Python The aim is that if all you know about computers is how to start a computer then you can learn Python from this book If you have previous programming experience you will be interested in understanding the differences between Python and your favorite programming language Python Computer Programming Academy,2020-11-24 Have you always wanted to learn computer programming but you re worried it will take too long Would you like to automate something simple with your PC but you don t know how to do it Or maybe you know other programming languages and are interested in learning Python quickly As a beginner you might think that programming is difficult and the possibility to give up before mastering it could be high So if you have a project to develop you could think on hiring a programmer to shorten the time This may seem like a good idea but it is certainly very expensive Otherwise you could waste your time pursuing tutorials online The best solution is to follow a complete programming manual with hands on projects and practical exercises What you will find inside and a quick overview of the main topics Why Python is considered the best programming language for a beginner The most common mistakes to

avoid when you start programming BOOK 1 PYTHON PROGRAMMING The 7 built in functions to make your life easier while coding a software program The program you need to develop your first own application BOOK 2 PYTHON MACHINE LEARNING The algorithms that will make your life easier The 2 libraries you need implementing to develop the desired ML models BOOK 3 PYTHON DATA SCIENCE 3 actions required to gain insights from big data A simple method to implement predictive analytics Some projects to write Python codes in less than a week Quizzes at the end of every chapter to review immediately what you ve learned Why is this book different Computer Programming Academy structured these guides as a course with seven chapters for seven days with special exercises for each section This protocol tested on both beginners and people who were already familiar with coding takes advantage of the principle of diving concentrating learning in one week The result The content of the course was learned faster and remembered longer Even if you re completely new to programming in 2020 or you are just looking to widen your skills as programmer this book is perfect for you Now s the best time to begin learning Python click the BUY NOW button and get started

Java Programming For Developers: The Definitive Guide to Learn JDBC And Database Applications Vivian Siahaan,Rismon Hasiholan Sianipar,2019-11-28 This step by step guide to explore database programming using Java is ideal for people with little or no programming experience The goal of this concise book is not just to teach you Java but to help you think like a programmer Each brief chapter covers the material for one week of a college course to help you practice what you ve learned As you would expect this book shows how to build from scratch two different databases MariaDB and SQLite using Java In designing a GUI and as an IDE you will make use of the NetBeans tool In the first chapter you will learn the basics of cryptography using Java Here you will learn how to write a Java program to count Hash MAC Message Authentication Code store keys in a KeyStore generate PrivateKey and PublicKey encrypt decrypt data and generate and verify digital prints In the second chapter you will learn how to create and store salt passwords and verify them You will create a Login table In this case you will see how to create a Java GUI using NetBeans to implement it In addition to the Login table in this chapter you will also create a Client table In the case of the Client table you will learn how to generate and save public and private keys into a database You will also learn how to encrypt decrypt data and save the results into a database In the third chapter you will create an Account table This account table has the following ten fields account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In this case you will learn how to implement generating and verifying digital prints and storing the results into a database In the fourth chapter You create a table with the name of the Account which has ten columns account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In the fifth chapter you will create a Client_Data table which has the following seven fields client_data_id primary key account_id primary_key birth_date address mother_name telephone and photo_path In chapter six you will be shown how to create

SQLite database and tables with Java In chapter seven you will be taught how to extract image features utilizing BufferedImage class in Java GUI Digital image techniques to extract image features used in this chapter are grascaling sharpening inverting blurring dilation erosion closing opening vertical prewitt horizontal prewitt Laplacian horizontal sobel and vertical sobel For readers you can develop it to store other advanced image features based on descriptors such as SIFT and others for developing descriptor based matching In chapter eight you will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In chapter nine you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 All six fields except keys will have a BLOB data type so that the image of the feature will be directly saved into this table In chapter ten you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In chapter eleven you will add two tables Victim and Case_File The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The Case_File has seven columns case_file_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables Finally this book is hopefully useful and can improve database programming skills for every Java MariaDB SQLite programmer

The Definitive Guide to Django
Jacob Kaplan-Moss, Adrian Holovaty, 2008-03-08 Django the Python based equivalent to the Ruby on Rails web development framework is hottest topics in web development In The Definitive Guide to Django Web Development Done Right Adrian Holovaty one of Django's creators and Django lead developer Jacob Kaplan Moss show you how they use this framework to create award winning web sites Over the course of three parts they guide you through the creation of a web application reminiscent of chicagocrime.org The first part of the book introduces Django fundamentals like installation and configuration You'll learn about creating the components that power a Django driven web site The second part delves into the more sophisticated features of Django like outputting non HTML content such as RSS feeds and PDFs plus caching and user management The third part serves as a detailed reference to Django's many configuration options and commands The book even includes seven appendices for looking up configurations options and commands In all this book provides the ultimate tutorial and reference to the popular Django framework

[A Comprehensive Guide to Java GUI Programming with SQLite](#)

Vivian Siahaan, Rismon Hasiholan Sianipar, 2020-01-02 The lessons in this book are a highly organized and well indexed set of tutorials meant for students and programmers. NetBeans, a specific IDE (Integrated Development Environment) is used to create GUI (Graphical User Interface) applications. The finished product is the reward, but the readers are fully engaged and enriched by the process. This kind of learning is often the focus of training. In this book, you will learn how to build from scratch a SQLite database management system using Java. In designing a GUI and as an IDE, you will make use of the NetBeans tool. Gradually and step by step, you will be taught how to use SQLite in Java. In chapter one, you will learn how to create a SQLite database and six tables. In chapter two, you will study creating the initial three table projects in the school database: Teacher table, TClass table, and Subject table. Creating database configuration files, creating a Java GUI for viewing and navigating the contents of each table, creating a Java GUI for inserting and editing tables, and creating a Java GUI to join and query the three tables. In chapter three, you will learn creating the main form to connect all forms. Creating a project will add three more tables to the school database: the Student table, the Parent table, and Tuition table. Creating a Java GUI to view and navigate the contents of each table, creating a Java GUI for editing, inserting, and deleting records in each table, creating a Java GUI to join and query the three tables, and all six tables. In chapter four, you will study how to query the six tables. In chapter five, you will create a Bank database and its four tables. In chapter six, you will learn the basics of cryptography using Java. Here, you will learn how to write a Java program to count Hash MAC Message Authentication Code, store keys in a KeyStore, generate PrivateKey and PublicKey, encrypt, decrypt data, and generate and verify digital prints. In chapter seven, you will learn how to create and store salt passwords and verify them. You will create a Login table. In this case, you will see how to create a Java GUI using NetBeans to implement it. In addition to the Login table, in this chapter, you will also create a Client table. In the case of the Client table, you will learn how to generate and save public and private keys into a database. You will also learn how to encrypt, decrypt data, and save the results into a database. In chapter eight, you will create an Account table. This account table has the following ten fields: account_id (primary key), client_id (primary key), account_number, account_date, account_type, plain_balance, cipher_balance, decipher_balance, digital_signature, and signature_verification. In this case, you will learn how to implement generating and verifying digital prints and storing the results into a database. In chapter nine, you will create a Client_Data table which has the following seven fields: client_data_id (primary key), account_id (primary key), birth_date, address, mother_name, telephone, and photo_path. In chapter ten, you will create a Crime database and its six tables. In chapter eleven, you will be taught how to extract image features utilizing BufferedImage class in Java GUI. In chapter twelve, you will be taught to create a Java GUI to view, edit, insert, and delete Suspect table data. This table has eleven columns: suspect_id (primary key), suspect_name, birth_date, case_date, report_date, suspect_status, arrest_date, mother_name, address, telephone, and photo. In chapter thirteen, you will be taught to create a Java GUI to view, edit, insert, and delete Feature_Extraction table data. This table has eight columns: feature_id (primary key), suspect_id (foreign key), feature1, feature2, feature3, feature4, feature5, and

feature6 All six fields except keys will have a BLOB data type so that the image of the feature will be directly saved into this table In chapter fourteen you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In chapter fifteen you will add two tables Victim and File_Case The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The File_Case has seven columns file_case_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables

FAQs About Python Programming Manual How To Books

What is a Python Programming Manual How To PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Python Programming Manual How To PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Python Programming Manual How To PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Python Programming Manual How To PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Python Programming Manual How To PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs?

Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
