Natural Language Processing with Python Quick Start Guide Nirant Kasliwal, 2018-11-30 Build and deploy intelligent applications for natural language processing with Python by using industry standard tools and recently popular methods in deep learning

Key Features

- A no math code driven programmer s guide to text processing and NLP
- Get state of the art results with modern tooling across linguistics text vectors and machine learning
- Fundamentals of NLP methods from spaCy gensim scikit learn and PyTorch

Book Description NLP in Python is among the most sought after skills among data scientists With code and relevant case studies this book will show how you can use industry grade tools to implement NLP programs capable of learning from relevant data We will explore many modern methods ranging from spaCy to word vectors that have reinvented NLP The book takes you from the basics of NLP to building text processing applications We start with an introduction to the basic vocabulary along with a workflow for building NLP applications We use industry grade NLP tools for cleaning and pre processing text automatic question and answer generation using linguistics text embedding text classifier and building a chatbot With each project you will learn a new concept of NLP You will learn about entity recognition part of speech tagging and dependency parsing for Q and A We use text embedding for both clustering documents and making chatbots and then build classifiers using scikit learn We conclude by deploying these models as REST APIs with Flask By the end you will be confident building NLP applications and know exactly what to look for when approaching new challenges

What you will learn

- Understand classical linguistics in using English grammar for automatically generating questions and answers from a free text corpus
- Work with text embedding models for dense number representations of words subwords and characters in the English language for exploring document clustering
- Deep Learning in NLP using PyTorch with a code driven introduction to PyTorch
- Using an NLP project management Framework for estimating timelines and organizing your project into stages
- Hack and build a simple chatbot application in 30 minutes
- Deploy an NLP or machine learning application using Flask as RESTFUL APIs

Who this book is for Programmers who wish to build systems that can interpret language Exposure to Python programming is required Familiarity with NLP or machine learning vocabulary will be helpful but not mandatory

Deep Learning with PyTorch Quick Start Guide David Julian, 2018-12-24

Introduction to deep learning and PyTorch by building a convolutional neural network and recurrent neural network for real world use cases such as image classification transfer learning and natural language processing

Key Features

- Clear and concise explanations
- Gives important insights into deep learning models
- Practical demonstration of key concepts

Book Description PyTorch is extremely powerful and yet easy to learn It provides advanced features such as supporting multiprocessor distributed and parallel computation This book is an excellent entry point for those wanting to explore deep

learning with PyTorch to harness its power This book will introduce you to the PyTorch deep learning library and teach you how to train deep learning models without any hassle We will set up the deep learning environment using PyTorch and then train and deploy different types of deep learning models such as CNN RNN and autoencoders You will learn how to optimize models by tuning hyperparameters and how to use PyTorch in multiprocessor and distributed environments We will discuss long short term memory network LSTMs and build a language model to predict text By the end of this book you will be familiar with PyTorch s capabilities and be able to utilize the library to train your neural networks with relative ease What you will learn

Set up the deep learning environment using the PyTorch library
Learn to build a deep learning model for image classification
Use a convolutional neural network for transfer learning
Understand to use PyTorch for natural language processing
Use a recurrent neural network to classify text
Understand how to optimize PyTorch in multiprocessor and distributed environments
Train optimize and deploy your neural networks for maximum accuracy and performance
Learn to deploy production ready models

Who this book is for Developers and Data Scientist familiar with Machine Learning but new to deep learning or existing practitioners of deep learning who would like to use PyTorch to train their deep learning models will find this book to be useful Having knowledge of Python programming will be an added advantage while previous exposure to PyTorch is not needed
