Martin, Dana L. Kelly, 1996 **Land Constraints and Agricultural Intensification in Ethiopia** Derek Headey, Mekdim Dereje, Jacob Ricker-Gilbert, Anna Josephson, Alemayehu Seyoum Taffesse, 2013-09-13 Highland Ethiopia is one of the most densely populated regions of Africa and has long been associated with both Malthusian disasters and Boserupian agricultural intensification This paper explores the race between these two countervailing forces with the goal of informing two important policy questions First how do rural Ethiopians adapt to land constraints And second do land constraints significantly influence welfare outcomes in rural Ethiopia To answer these questions we use a recent household survey of high potential areas We first show that farm sizes are generally very small in the Ethiopian highlands and declining over time with young rural households facing particularly severe land constraints We then ask whether smaller and declining farm sizes are inducing agricultural intensification and if so how We find strong evidence in favor of the Boserupian hypothesis that land constrained villages typically use significantly more purchased input costs per hectare and more family labor and achieve higher maize and teff yields and high gross income per hectare However although these higher inputs raise gross revenue we find no substantial impact of greater land

constraints on net farm income per hectare once family labor costs are accounted for Moreover farm sizes are strongly positively correlated with net farm income suggesting that land constraints are an important cause of rural poverty We conclude with some broad policy implications of our results *Transfer Pricing* Frederick W.
