Project Management Gray Larson 5 Edition:

The Practice and Theory of Project Management Richard Newton, 2019-11-05 Managing projects a prominent feature of working life inevitably involves change at some level Even though successful project management depends on organisational change textbooks often fail to recognise this symbiotic nature This book offers students a practical understanding of the strategic and organisational role of projects Becoming a Project Manager Amie Jane Leavitt, 2017-07-15 All projects require a competent manager and that is most certainly the case with big IT projects Technical project managers supervise all aspects of the project manage personnel oversee budgets ensure that the work stays on schedule and execute communication plans between all parties In this title readers will find out if they have what it takes to become a technical project manager They will learn what the job entails what skills and personality are required for the job the types of training and education needed and what a typical day on the job is like Sustainable Business Geoffrey Wells, 2013-01-01 This is an immensely useful and important book By applying sustainability theory and practice to all areas of business management for firms of all sizes it has the potential to make a significant difference to the long term viability of businesses and the societies in which they operate Juliet Roper The University of Waikato New Zealand Recent surveys of international CEOs confirm that companies increasingly see sustainability as critical to their business strategy The rigorous academic framework for the field of sustainable business required to respond to this need is now emerging This book presents important new work in the theory of the sustainable firm in the application of sustainability principles to key management disciplines in sustainable business in practice and in the international challenges that are critical to sustainability demands Sustainable Business will prove invigorating for both undergraduate and graduate students on business society and sustainability themed courses Policymakers and practitioners will find the urgent global sustainability issues and sub disciplines essential *Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy* Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect

data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment
