Too-Big-to-Fail in Banking Tom Filip Lesche, 2021-06-28. This book provides a comprehensive summary of the latest academic research on the important topic of too big to fail (TBTf) in banking. It explains

TBTF from various perspectives including the range of regulatory measures proposed to counter TBTF most notably the globally accepted regulation of global systemically important banks G SIBs and its main tool of capital surcharges The empirical analysis quantifies the shareholder value of the G SIB attribution by using quarterly observations from more than 750 global banks between Q2 2008 and Q3 2015 The main finding is that G SIBs are confronted with a substantial relative valuation discount compared to non G SIBs From the end of 2011 until the end of 2015 a stable discount of 0.6x to 0.8x price to tangible common equity P/TCE is statistically highly significant The results suggest that the G SIB designation effect which positively impacts G SIBs share prices because of funding benefits from IGGs is dominated by the regulatory G SIB burden effect which negatively impacts G SIBs share prices because of lower profitability due to capital surcharges and other regulatory requirements placed on G SIBs The findings re-open the debate about whether breaking up G SIBs would unlock shareholder value and whether G SIBs are regulated efficiently Can We Make Them Use These Strategies? Meike Bergs, 2019-08-22 Um erfolgreich forschend lernen zu können müssen Schülerinnen und Schüler bestimmte Handlungsweisen erlernen und einbringen In einer Pre-Post Studie zum Strategielernen wurden das hypothesengeleitete Experimentieren und die Control of Variables Strategie zunächst vermittelt Danach sollten diese Strategien in zwei Experimentierumgebungen unterstützt durch z.B.
