**Top Essential Oils** To make essential oils it needs to be extracted from the plant This can be done through expression and distillation Expression also referred as cold pressing expression is method used to extract oils from citrus fruits like lime orange tangerine lemon and bergamot In the past expression doesn t require any sorts of tools except for a sponge After soaking the citrus rind or zest it will be pressed against the sponge repeatedly to absorb the oil The sponge will then be squeezed over a container to catch the oils and allow it to separate from its juices After a few hours the oils will be siphoned off and bottled A modern type of expression involves using a blender like device that s equipped with spikes Once the citrus zest rind or peel is placed into the device it will rotate and prod and prick the citrus until the oils are released Oil will be collected at the bottom of the device and bottled immediately
