## **Human Resource Planning Journal:**

*Human Resource Planning*, 1988      **Human Resource Planning** David M. Schweiger, 2013-03-08 Due to escalating pressures from domestic and global competitors and changes in societal norms, laws and the economy during the past decade it has become clear to many executives that people are increasingly important to the success and survival of their companies but also increasingly more complex to manage. Moreover, it is likely that the complexity will increase even further in the Nineties as global and regional economies continue to emerge. In Europe entirely new political entities will contribute to complexity and pose difficult problems in a multi-ethnic society. While creating many challenges, these pressures are also creating excellent opportunities for human resource executives to make substantial contributions to their organizations. Whether such opportunities are realized, however, will depend upon how well these executives develop, refine and leverage both their business and human resource management skills. This book, which is a collaborative effort on the part of the editors of the Human Resource Planning journal and Gabler Publishing, is intended for both line and HR executives interested in more effectively managing their employees. It is a compilation of selected cutting-edge articles published in the journal during the past five years. It is divided into the following seven sections which represent important HR issues facing executives today and in the near future: Section 1 The Human Resource Function in Transition; Section 2 Strategic Human Resource Planning; Section 3 Mergers and Acquisitions; Section 4 Performance Appraisal and Performance Management; Section 5
