### **STEMinism: How Women Are Rewriting the Rules of Science, Technology, and Engineering** Arya

Asher, 2025-03-30

**STEMinism: How Women Are Rewriting the Rules of Science, Technology, and Engineering** Discover the untold stories of women who revolutionized STEM fields from hidden pioneers like Katherine Johnson to modern innovators like Dr. Kizzmekia Corbett. **STEMinism** explores the fight for gender equity in science, technology, and engineering, offering actionable strategies to dismantle barriers and inspire the next generation of female leaders.

**Unearth the Hidden Figures of STEM History** **STEMinism: How Women Are Rewriting the Rules of Science, Technology, and Engineering** is a groundbreaking exploration of women's contributions to STEM, contributions often erased from textbooks, patents, and lab credits. This meticulously researched book spans centuries and continents, revealing how women like Marie Curie (Nobel Prize-winning physicist), Ada Lovelace (the first computer programmer), and Dr. Gladys West (hidden architect of GPS) defied societal norms to reshape our world.

With over 23 chapters blending biography, policy analysis, and cultural critique, this book is not just a history lesson; it's a call to action for gender equity in male-dominated fields.

**Why This Book Matters Now** In an era where women hold just 28% of STEM jobs globally (UNESCO 2024) and face systemic biases in funding, recognition, and leadership roles, **STEMinism** bridges the gap between historical struggles and modern solutions.

Dive into chapters like **Lab Girls: The Secret History of Women in Science** and **The Fight for Equity: Breaking Bias in STEM** to understand how Rosalind Franklin's DNA research was co-opted by male peers, epitomizing the Matilda Effect. Why Dr. Chien Shiung Wu, despite debunking the Law of Parity, was excluded from the Nobel Prize? How modern leaders like Dr. Fei Fei Li (AI ethics pioneer) and Whitney Wolfe Herd (Bumble CEO) are redefining tech's future?

**Key Themes & Takeaways**

- Trailblazers:** Hidden Figures, Celebrate pioneers like Katherine Johnson (NASA mathematician) and Josephine Cochrane (inventor of the dishwasher, whose work was minimized or stolen).
- Intersectional Challenges:** Analyze how race, class, and geography compound barriers for Black women, Indigenous innovators, and Global South scientists.
- Modern Movements:** Explore initiatives like VanguardSTEM and Black Girls CODE that empower underrepresented groups through mentorship and advocacy.
- Actionable Solutions:** Learn policy reforms, e.g., Iceland's Equal Pay Standard, corporate strategies like Intel's 50% female tech workforce pledge, and grassroots tools like bias interruption scripts.

STEM Professionals, Navigate workplace bias, negotiate salaries, and amplify marginalized voices. Policymakers, Executives, Implement data-driven equity frameworks in hiring, funding, and R&D. Advocates, Allies, Join global movements fighting for representation in AI, climate tech, and space exploration.

*Divorced Dads* Sanford L. Braver,Diane O'Connell,1998 Millions of families strive to give their children the best possible upbringing after being split apart by divorce Separated mothers and fathers and in many cases their second spouses struggle to find the right way to piece together parent child relationships in its wake In this revolutionary work psychologist Sanford L Braver who undertook the largest ever federally funded study on issues confronting divorced fathers shows how millions of well intentioned mothers fathers judges lawyers educators and other caregivers have been repeatedly and tragically misled by the prevailing data about divorce and parenthood For years our society has accepted the image of the dead beat dad who shirks childcare payments and other responsibilities Yet Braver proves that this villainous figure like many other myths of the divorced parent simply does not exist in significant numbers Moreover Braver overturns one of the most important pieces of data on divorce in the past quarter century the belief that divorced women suffer a steep decline in their standard of living

This widely embraced notion was the result of misread data but was transformed into fact by the media and the courts and accepted by divorced families and their advocates No other book has revealed the deep flaws in today s research on divorce One sided studies of divorced men and women misused census data and poor research have skewed many of the assumptions around which parents and courts have shaped divorce settlements parenting responsibilities and child rearing decisions Every divorced parent and anyone who loves a divorced parent urgently needs this book to understand the newrealities behind divorce and parenting Notes Index **American Book Publishing Record** ,1992
