What are Physical Properties?

Start with the title in the chapter before you start to read the chapter. Focus on how various properties

of physical properties is characterized. They can be observed without changing the identity of the substance. However, the properties of an object change as it reacts. For example, you can identify an object's color, taste, smell, and its weight. However, the properties of an object are determined by the properties of the particles the object consists of.

Many of the physical properties of materials that make up objects can be measured. These properties include weight, hardness, magnetism, and the ability to conduct heat and electricity.

Some physical properties depend on how much of a material you have. In other words, a large amount of a material may have different properties than a smaller amount of the material. Other physical properties do not depend on how much of the material you have. They show that no matter how large or small something is, it has the same physical property or always the same
