Hihara,Ralph P.I. Adler,Ronald M. Latanision,2013-10-23 One of the main ongoing challenges for any engineering enterprise is that systems are built of materials subject to environmental degradation Whether working with an airframe integrated circuit bridge prosthetic device or implantable drug delivery system understanding the chemical stability of materials remains a key element in determining their useful life Environmental Degradation of Advanced and Traditional Engineering Materials is a monumental work for the field providing comprehensive coverage of the environmental impacts on

the full breadth of materials used for engineering infrastructure buildings machines and components The book discusses fundamental degradation processes and presents examples of degradation under various environmental conditions Each chapter presents the basic properties of the class of material followed by detailed characteristics of degradation guidelines on how to protect against corrosion and a description of testing procedures A complete self contained industrial reference guide this valuable resource is designed for students and professionals interested in the development of deterioration resistant technological systems constructed with metallurgical polymeric ceramic and natural materials

Friction, Lubrication and Wear Mohammad Asaduzzaman Chowdhury,2019-10-30 Tribology has rapidly expanded in recent years as the demand for improved materials has increased The good function of numerous electrical electrochemical mechanical and biological systems or components depends on suitable friction lubrication and wear as well as tribological values In this context the study of friction wear and lubrication is of tremendous pragmatic importance The reduction of friction and loss of materials in relative motion are important challenges to improveing energy efficiency This book guides the rational design of material for technological application Chapters cover topics such as the resistance of dry abrasive wear the role of a brand new additive in the minimization of friction and wear the structural energy model of elastic plastic deformation the influence of micro abrasive wear modes tribological characteristics of magneto rheological fluids MRFs and magneto rheological elastomers MREs and different treatment technologies to improve tribological properties among others *Catalogue*
