Thinking Across the Curriculum is designed to help students enhance their thinking skills in every class. The skills discussed are needed in every academic area and setting both in and out of class. They are determining cause, assessing likelihood and uncertainty, comprehending complex text, solving novel problems, making good decisions, evaluating claims and evidence, and thinking creatively. In this adaptation of her best-selling text, Diane Halpern applies the theories and research of cognitive psychology to the development of critical thinking and learning skills needed in the increasingly complex world in which we work and live. The book is distinguished by its clear writing style, humorous tone, many practical examples and anecdotes, and rigorous academic grounding. Everyday examples and exercises promote the transfer of critical thinking skills and dispositions to real world settings and problems. The goal is to help readers recognize when and how to apply the thinking skills needed to analyze arguments, reason clearly, identify and solve problems, and make sound decisions. Also of importance, a general thinking skills framework ties the chapters together, but each is written so that it can stand alone. This organization allows for maximum flexibility in the selection of topics and the order in which they are covered. This book is intended for use in any course emphasizing critical thinking as an approach to excellence in thinking and learning.

Critical Thinking Bruce N. Waller, 2005. The city of Cork experienced a political odyssey between Easter 1916 and the end of 1918. Wartime policies conceived in London manifested themselves unexpectedly in Cork. The Defence of the Realm Act was used to repress political speech, deficit spending generated massive inflation, mandatory arbitration encouraged workers to join trade unions, food rationing panicked a country scarred by the Potato Famine, and military conscription generated virtual rebellion. As a result, the Cork public increasingly turned against the war. The book examines the political situation in Cork prior to the Easter Rising, local reactions to the rebellion, the rapid creation of the Republican mass movement, the dramatic decline of the Irish Party, the explosion of anti-authority street rioting, the mobilization of women in the independence struggle, disturbances against venereal disease treatments, and visiting American sailors. The emergence of radical trade unionism, agitation over the retention of local food supplies, the nationalist mobilization during the Conscription Crisis, and Sinn Féin's triumph in the 1918 General Election.

Teachers and Teaching Strategies Gerald F. Ollington, 2008. If the future of any society can be pinpointed, it is with the teachers who help form the citizens of tomorrow. Sometimes their impact is equal to the parents and sometimes surpasses it by not a small measure. This book tackles teaching Strategies, Innovations, and Problem Solving as the focal points in teaching.
