school library or showcasing the accomplishments of the academic library infographics can be a vital part of the library's playbook. The book describes ways to use infographics to raise funds for a public library, teach critical thinking and 21st century skills in the school library, illustrate why libraries matter by relaying value of academic libraries, market the library, improve information literacy in academic settings, advocate for resources and services.

**Digital Literacies and Interactive Media** Earl Aguilera, 2022-08-19 This text responds to changing literacy practices in the digital age by developing an interdisciplinary framework for analysis of digital content created by students. Drawing on scholarship that expands traditional understandings of literacy to account for new ways in which students engage with interactive text and media, Aguilera develops a methodological toolkit for formal analysis of multimodal representations. This book frames the central challenges faced by researchers entering the field of digital literacy studies, presents a nuanced discussion of digital mediation, and brings these topics to life in the case study of a Code Club, a library-based computer programming club for elementary, middle, and high school students. The three-dimensional framework, which offers a schema for analysis of multimodal content, computational procedures, and contextual factors involved in the creation and interpretation of digital content, serves as a much-needed framework for the critical analysis of digital multimodal composition. This text will benefit researchers, academics, and educators in the areas of language and literacy, multimodality, and technology and digital innovation in education.

Fake News in Context Lesley S. J. Farmer, 2020-12-17 Fake News in Context defines fake news and sets it within a historical and international context. Helping readers to become more skilled at detecting misinformation, the book also demonstrates how such knowledge can be leveraged to facilitate more effective engagement in civic education. Distinguishing between fake news and other forms of misinformation, the book explains the complete communication cycle of fake news: how and why it is created, disseminated, and accessed. The book then explains the physical and psychological reasons why people believe fake news. Providing generic methods for identifying fake news, Farmer also explains the use of fact-checking tools and automated algorithms. The book then details how various literacies, including news media, visual information, digital, and data, offer unique concepts and skills that can help interpret fake news. Arguing that individuals and groups can respond and counter fake news, which leads to civic engagement and digital citizenship, the book concludes by providing strategies for instruction and tips for collaborating with librarians. Including a range of international examples, Fake News in Context will be of interest to teaching faculty and students of library and information science, communication studies, media studies, politics, and journalism.
