State, Labor, and the Transition to a Market Economy Agnieszka Paczyńska, 2012-11-15 In response to mounting debt crises and macroeconomic instability in the 1980s many countries in the developing world adopted neoliberal policies promoting the unfettered play of market forces and deregulation of the economy and attempted large scale structural adjustment including the privatization of public sector industries How much influence did various societal groups have on this transition to a market economy and what explains the variances in interest group influence across countries In this book Agnieszka Paczyńska explores these questions by studying the role of organized labor in the transition process in four countries in different regions the Czech Republic and Poland in eastern Europe Egypt in the Middle East and Mexico in Latin America In Egypt and Poland she shows labor had substantial influence on the process whereas in the Czech Republic and Mexico it did not Her explanation highlights the complex relationship between institutional structures and the critical junctures provided by economic crises revealing that the ability of groups like organized labor to wield influence on reform efforts depends to a great extent on not only their current resources such as financial autonomy and legal prerogatives but also the historical legacies of their past ties to the state This new edition features an epilogue that analyzes the role of organized labor uprisings in 2011 the protests in Egypt the overthrow of Mubarak and the post Mubarak regime

*Welfare States in Transition* I. Collier, H. Roggemann, O. Scholz, H. Tomann, 2016-01-18 Social policy in East and West finds itself today in the middle of a fundamental transition The former communist countries of Central and Eastern Europe and the successor states to the former Soviet Union are attempting to create the institutions needed for a modern market economy and a modern democratic welfare state At the same time the mature welfare states of Europe are struggling to solve the contemporary financial crisis of their systems of social entitlements Because of fundamental economic and demographic trends these systems will become increasingly difficult to sustain over the coming decades The contributors overwhelmingly agree that it would be mistaken policy to simply copy the institutions of Western welfare states to the Eastern economies in transition Instead one can learn much from the experience gathered over the past half century in Western welfare states
