Lo spirito di Arcetri Roberto Casalbuoni, Daniele Dominici, Massimo Mazzoni, 2021-10-13 Il volume ripercorre gli anni salienti dell'attività dell'Istituto di Fisica di Arcetri in occasione del centenario dell'inaugurazione. Il periodo prescelto che permette di ricostruire la nascita di alcuni gruppi di ricerca presenti tuttora nel Dipartimento va dall'arrivo di Garbasso nel 1913 alla fine degli anni Sessanta. Il testo contiene una prima parte sulla storia dell'Istituto di Fisica negli anni appena citati, cui segue una seconda parte in cui vengono delineate le schede biografiche di alcuni dei protagonisti. Nell'ultima parte viene riportato un indice dei titolari dei corsi di Fisica e di Astronomia a Firenze dal 1876 al 1969, risultato del lavoro di ricerca condotto presso l'Archivio Storico dell'Università di Firenze.

Modeling Density-Driven Flow in Porous

Media Ekkehard O. Holzbecher, 2012-12-06 Modeling of flow and transport in groundwater has become an important focus of scientific research in recent years Most contributions to this subject deal with flow situations where density and viscosity changes in the fluid are neglected This restriction may not always be justified The models presented in the book demonstrate impressingly that the flow pattern may be completely different when density changes are taken into account The main applications of the models are thermal and saline convection geothermal flow saltwater intrusion flow through salt formations etc This book not only presents basic theory but the reader can also test his knowledge by applying the included software and can set up own models
