Strong Stability Preserving Runge-kutta And Multistep Time Discretizations Chi-wang Shu, Sigal Gottlieb, David Ketcheson, 2011-01-26. This book captures the state of the art in the field of Strong Stability Preserving SSP time stepping methods which have significant advantages for the time evolution of partial differential equations describing a wide range of physical phenomena. This comprehensive book describes the development of SSP methods, explains the types of problems which require the use of these methods and demonstrates the efficiency of these methods using a variety of numerical examples. Another valuable feature of this book is that it collects the most useful SSP methods both explicit and implicit and presents the other properties of these methods which make them desirable such as low storage, small error coefficients, large linear stability domains. This book is valuable for both researchers studying the field of time discretizations for PDEs and the users of such methods.

Cooling Energy Solutions For Buildings And Cities Mat Santamouris, 2019-02-12. In the first book of its kind, this volume addresses the problem of the future cooling energy demand. The global frame defining the actual and future cooling energy consumption in the building sector. Based on the explored inputs and forecasts, a model was developed to predict the future cooling energy consumption of both the residential and commercial sector. Low energy, high performance technological solutions for cooling energy problem in the building and city level will be presented.
