

Analyze

1. See Data Table.
2. See Data Table.
3. See Data Table. Sample Calculation for Pluto: $e = 4/16 = 0.25$
4. See Data Table.
5. Both foci are at the center.
6. It is very close to being a circle.
7. The comet. It looks more flattened out than the other orbits.

Conclude and Apply

1. Yes, the planets and comet travel in elliptical orbits.
2. Since the eccentricity of Earth is so small, Kepler might not have concluded that planets have elliptical orbits.
3. It travels fastest at perihelion. According to Kepler's second law, equal areas are swept out in equal time. Since there is less area available at perihelion, the planet must move faster.

$$4. \frac{v_P}{v_A} = \frac{A}{P} = \frac{10.0}{6.0} = \frac{1.7}{1}$$

5. $v_A =$ minimum velocity
 $= 3.7 \text{ km/s}$
 $v_P = 1.7 \times v_A$
 $= 1.7 \times 3.7 \text{ km/s}$
 $= 6.3 \text{ km/s}$

Going Further

1. Collect data using dates of location of a planet. Use areas and dates to confirm the second law.
2. In order to show the third law, a computer model would have a planet actually moving so that periods and distances could be measured.

Real-World Physics

Students can research elliptical orbits of satellites. Encourage the students to pick one or two satellites and, if possible, plot orbit data to determine the path that each satellite takes.

Universe 1931 is one of the most influential works of Russian philosopher and mystic P D Ouspensky where he combines philosophy science religion and esotericism in an attempt to offer a unified vision of human knowledge The book explores themes such as the perception of time relativity depth psychology mystical traditions religious symbolism and the nature of consciousness Ouspensky seeks to integrate the rational thought of modern science with the timeless truths of philosophy and spirituality showing that mystical experience and scientific knowledge are not opposites but complementary paths to understanding reality Throughout its pages the author proposes that reality is far broader than what ordinary senses can perceive and that human beings have the potential to reach higher states of consciousness through study inner discipline and openness to transcendent knowledge A New Model of the Universe is not merely a theoretical reflection but also a practical invitation to expand the mind and transcend the limits of a purely materialistic worldview This work established Ouspensky as one of the most important voices in twentieth century esoteric thought **Fundamentals of Physics, Part 4, Chapters**
